House Bill No. 1540

EXPLANATORY NOTE

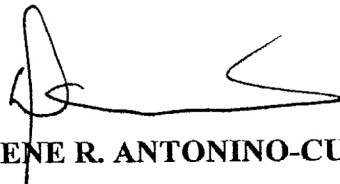

This bill seeks to reserve for public, quasi-public and resettlement purposes a certain tract of land of the public domain located in Barangay Tambler, General Santos City under the administration and management of the City of General Santos.

A burgeoning city which has become one of the economic hubs in Southern Mindanao, and more particularly dubbed as the Tuna Capital of the Philippines, General Santos City has been the subject of heavy internal migration of the past several years. People flock to the city in search of employment and golden opportunities, causing the population to swell to a record of Four hundred eleven thousand eight hundred twenty two (May 1, 2000 census). Worst with a population growth of 5.05% General Santos City has the third highest growth rate in the country (next only to Tawi-tawi and Laguna at 5.53 and 5.45% respectively.)

If not properly managed and resolved therefore, the urban migration and the resultant social problems that it breeds will produce problems of unmanageable proportions.

This bill therefore aims to lessen the impact of urban migration and population growth in General Santos as it seeks to set aside a portion of the public domain for public, quasi-public and especially resettlement purposes. Squatter colonies are sprouting like mushrooms in the city. Ideal urban planning demands that residents live in decent and comfortable surroundings. Blight areas are conducive to the commission of crimes, contracting of diseases and do not inspire people to achieve more for a better future.

In view of the foregoing considerations, approval of this bill is earnestly requested.
