THIRTEENTH CONGRESS
First Regular Session

House Bill No. 1913

Introduced by the **Honorable ROILO GOLEZ**

EXPLANATORY NOTE

The public must not be discriminated against in the ownership or purchase of shares in the disposition of government corporations under the privatization program.

There are three (3) vital privatization objectives: revenue generation for the National Government, increase in economic/technical efficiency and to broaden public ownership of enterprises including the development of capital markets.

A careful perusal of the disposition schemes availed of would support the proposition that only those financially capable are able to make the necessary bids. Sales to investors have resulted in undue concentration of economic power in the hands of few groups or individuals. Certain economic elites end up concerning the disposition of assets for the scheme in itself is built in their favor. The reality of the matter is that no Juan de la Cruz can afford to bid a million or more.

This attendant bill merely rectifies this most favored arrangement by giving priority to securitized selling or public offer. We therefore give the proper signal in favor of wider ownership base of enterprises and uphold the long-standing principle prohibiting combinations in restraint of trade or unfair competition.

In fine, we set a play level field for Juan de la Cruz and hope for a day when Juan de la Cruz can command a better service and service is accorded him for he has a stake in the corporation, this in its sense is democratization of wealth and de-concentration of economic power thereby extensively enlarging the economic base of the country.

Approval of this bill is earnestly urged.
