THIRTEENTH CONGRESS
First Regular Session

HOUSE BILL NO. 2050

Introduced by Hon. Eduardo C. Firmalo

EXPLANATORY NOTE

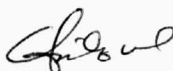

The Constitution underscores the importance of education in the life of the nation. A country whose people's talents are honed to its finest is a country rich in human resources and capable of coping with the challenges of a modernizing world.

Developments in the country and around the world call for drastic reforms in our educational system. The trend all over is toward the development of capabilities in the fields of mathematics, science, and technology without which our country will lag behind.

In most provinces today, our educational orientation is still focused on traditional courses which are becoming outdated. To keep abreast with changing times and the fast pace of technological development all over the world, we need to undertake drastic reforms in our educational system.

We, in the province of Romblon, desire to upgrade the quality of education for our young people who have the brains and potentials for modernistic courses. And as a start, we desire to establish a science high school that will prepare them for higher courses in the fields of medicine, engineering, technology, and the sciences.

We earnestly request, therefore, the approval of this measure.
