HOUSE BILL NO. 2061

Introduced by Hon. Eduardo C. Firmalo

EXPLANATORY NOTE

Water is a basic need in rural communities. There is scarcity of water in many parts of our province, especially in island municipalities. In some areas where there are no water systems, our people depend solely on rain water.

We wish to remedy this situation by setting up water systems in especially blighted areas of the province, where the municipal governments do not have the financial capability to install and maintain their own.

The establishment of a water system in such municipalities will be of great relief to our people who have long suffered from lack of potable water.

We implore Congress to approve this measure.
