

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City

THIRTEENTH CONGRESS

HOUSE BILL No. 2199

INTRODUCED BY HON. JOSE G. SOLIS

EXPLANATORY NOTE

The basic requisite in the pursuit of national development is a prudent use of land resource. Only through a comprehensive land use plan can we efficiently use our resources to propel the country towards economic and social development.

However, efforts are being hampered by the lack of available information related to land resources which are necessary for efficient land use. The data available are either inadequate or grossly outdated.

In order to respond to the challenges of development, there is an urgent need to modernize the National Mapping and Resource Information Authority (NAMRIA). The NAMRIA, in fulfilling its mandate of supplying all necessary information on land resource matters, must be at the forefront of national planning and development.

This bill seeks to establish a modernization program for the NAMRIA in order to effectively fulfill its mandate. This modernization program shall undertake the following programs:

- a. National Mapping Program which aims to accelerate the production of digital base maps and information for environment planning and development within a geographic information system environment.
- b. Information Technology Strategic Plan, which seeks to develop and define an over-all medium-term information technology structure for NAMRIA to include the proposed technology, data application and service models in order to address the agency's information needs at both management and operational levels.
- c. Data acquisition from satellite missions through the establish of a multi-satellite multi-purpose ground receiving station, the development of Hydrographic, Oceanographic Surveys and Nautical Charting of the Exclusive Economic Zone and the development of innovative techniques in generating geographic information.

The modernization program shall benefit not only our local government units and the various national planning agencies but also the private sector as well. The following benefits and assistance are foreseen to be derived upon the completion of the "NAMRIA Modernization program".

1. **Local Government Sector.** Regional, provincial, municipal, and integrated are development planning, zoning and control of land use, establishment of boundaries of local government units (LGUs), barangay roads, and water systems classification of LGUs according to levels of development effective implementation of the Local Government Code provision of a data base of information for tax mapping operations and efficient real estate tax collection system, litigation of land cases and processing of applications for certificates of land titles, assessment of taxes and other revenue generating program.;
2. **Economic Sector.** Physical framework, planning, monitoring and evaluation of geographic locations, planning of urban, regional and economic growth centers and countryside development.
3. **Agricultural Sector.** Planning geographic locations of agricultural support services, identification of areas suitable for agriculture, formulation of local security measures and prediction of food yields, comprehensive Agrarian Reform program Monitoring, integrated forestry programs.
4. **Environmental and Natural Resources Sector.** Regulation and disposition of public forest lands, monitoring the exploitation and depletion of natural resources, resources development and conservation planning, environmental and forest protection, watershed management and resource policy formulation, support to legislation such as Irrigation Crisis Act, Forestry Code, Mining Law, National Land Use Code, Land Code, national Integrated Protected Areas System Law among others.
5. **Public Works Sector.** Infrastructure planning, design and development, facilities planning and management, location of facilities including but not limited to water pipes, electrical and telephone lines for proper repair, maintenance, building and excavation scheduling formulation and utilization of long term programs of disaster prevention through preventive infrastructure.
6. **National Defense Sector.** Planning strategic and intelligence operations, mapping out territorial limits of the country for security purposes.
7. **Transportation, Communications and Tourism.** Development of effective traffic management system, efficient road planning, alternative route management and other areas of concern for public transport needs, road condition monitoring, railroad planning, navigable river and coastal shipping reference for the development of a feasible alternative passenger system.
8. **Health and Social Welfare Sector.** Physical planning of health support services and surveys relief operation planning, disaster management guide, hazard and risk evaluation, formulation of disaster preventive programs.
9. **Education Sector.** Updated reference materials.

10. **Private Sector.** Thematic mapping selection and development of sites for real estate and other development, efficient delivery of services and to furnish at minimal cost, integrated and comprehensive land database.

In view of the foregoing considerations the immediate passage of this bill is earnestly sought.

JOSE G. SOLIS
Congressman

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City

THIRTEENTH CONGRESS

HOUSE BILL No. 2199

INTRODUCED BY HON. JOSE G. SOLIS

AN ACT
PROVIDING FOR THE MODERNIZATION OF THE NATIONAL MAPPING AND
RESOURCE INFORMATION AUTHORITY (NAMRIA)

Be it enacted by the Senate and the House of Representatives of the Philippines in Congress assembled:

SECTION 1. Short Title. - This Act be known as the "NAMRIA Modernization Act".

SECTION 2. Declaration of Policy. - It is hereby declared the policy of the state to promote a just and dynamic social order that will ensure the prosperity and independence of the nation and free the people from the poverty through policies that provide adequate social services, promote full employment, a rising standard of living and an improved quality of life for all. However, national development and policies must be based on current information on land resources. The National Mapping and Resource Information Authority (NAMRIA) as sole custodian of all land-resource related information, shall therefore be a prime mover of national development planning. Towards this end, the State shall promote and pursue the Modernization of National Mapping and Resource Information authority (NAMRIA) to a level where it can effectively and fully perform its mandate to act as the central surveying and mapping agency of the Republic of the Philippines.

SECTION 3. Objectives of the NAMRIA Modernization program.

- (a) To promote the conservation and management of the country's natural resources by assisting the various agencies of government in their effort towards the proper determination of the country's land boundaries and other related physical, geographic, demographic and socio-economic characteristics.
- (b) To develop its present capabilities as the central surveying and mapping agency of the government by implementing an equipment acquisition program consonant with technological advances to hasten the conduct of needed nationwide geodetic, topographic, hydrographic and oceanographic surveys.
- (c) To establish a one stop-shop of geographically referenced ocean and land database and related information.

SECTION 4. General Mandate and Responsibilities. - The NAMRIA shall have the following general mandate and responsibilities:

- (a) To act as the Government's central surveying and mapping agency providing map making and related services to government instrumentalities;
- (b) To be the official depository and distribution agency for land and natural resources database.
- (c) To conduct land and natural resources classification surveys, inclusive of all marine resources within the maritime zones.
- (d) To undertake continuing ocean and land research resources database development activities, and
- (e) To upgrade, modernize and acquire appropriate surveying and map making technology and equipment.

SECTION 5. Components of the NAMRIA Modernization Program. - The NAMRIA Modernization Program shall consist of the following components:

- (a) **RESTRUCTURING AND ORGANIZATIONAL DEVELOPMENT.** Aims to effectively and efficiently carry out the nationwide coordination of geographic information development activities and to strengthen research and development program.
- (b) **TECHNOLOGY AND STRATEGIES SYSTEMS DEVELOPMENT.** Aims to provide a mechanism for the acquisition and installation of appropriate systems and technology to improve the delivery of its products and services.
- (c) **HUMAN RESOURCE DEVELOPMENT.** Aims to upgrade the skills of its personnel, develop, implement and institutionalize a program designed to optimize personnel capabilities through a sustainable training and develop strategies in improving the quality of work as well as the standard of living of its personnel.

SECTION 6. Development of NAMRIA Capabilities. - The modernization of NAMRIA shall be geared towards the development of the following capabilities.

(a) **ENHANCEMENT OF MAPPING CAPABILITIES** - The NAMRIA, being the central mapping agency of the government, shall develop and upgrade its map production capabilities to digital technology. To this end, it shall:

- 1. provide updated water and land-based information in the form of digital base map and charts within geographic information environment.
- 2. provide nationwide coverage of updated large scale maps in graphic and digital format of urban areas, centers of population and development areas.
- 3. conduct periodic resource and environment surveys for the generation of updated, standardize and reliable geographic and resource information, and
- 4. service the various needs of government agencies and the private sector

(b) DEVELOPMENT OF INFORMATION TECHNOLOGY CAPABILITY
- The NAMRIA, shall be develop its technology structure by establishing a one-stop source of geographically referenced ocean, land and resource database information. To this end, it shall:

1. eliminate data duplication and provide a mechanism for data sharing with other government agencies and instrumentalities;
2. provide a rapid response system to generate maps and charts for disaster management in coordination with concerned agencies and for high priority planning in development areas;
3. keep up with the demand for complete and updated land, water and natural resources data bases, land use classification maps, inclusive of microfilm and microfiche processes.
4. Provide better access to its products and services, and
5. Speed up its base mapping, revision and technological programs

(c) IMPROVEMENT OF DATA ACQUISITION CAPABILITY - The following programs shall be implemented to enhance the data acquisition capability of NAMRIA.

1. Establishment of Ground Receiving Station - The NAMRIA shall develop its data acquisition capability by operating a multi-satellite, multi-purpose ground station in order to:
 - 1.a establish and develop its capabilities for real or near data acquisition.
 - 1.b conduct disaster monitoring and damage assessment, detect potential environmental hazard and near real time inventory of resources in coordination with other government agencies.
 - 1.c serve as user service unit.
2. Upgrading of Surveys and Charting Capabilities. - The NAMRIA shall and increase its capabilities for hydrographic, oceanographic and geographic surveys and nautical charting capabilities. To this end, it shall:
 - 2.a produce up-to-date nautical charts of the Exclusive Economic Zones to ensure safety of navigation and provide basic reference in planning and executing all marine activities in the country.
 - 2.b delineate the different maritime zones of the country in coordination with other government agencies.
 - 2.c provide technical data needed in the judicious delimitation of overlapping international boundaries.
 - 2.d generate marine scientific information for assessment and efficient management of living and non-living ocean resources for both government and non government units.

- 2.e densify existing geographic network, integrate existing cadastral and control data into Philippine Resources System establishment of a network maintenance system and modernization of surveys practices.
- 2.f initiate the delineation of administrative boundaries throughout the country in coordination with the Land Management Bureau and other government agencies.

(d) **IMPROVEMENT OF REASEARCH AND DEVELOPMENT CAPABILITY** NAMRIA shall undertake researches in order to develop new techniques in generating geographic information. To this end, it shall:

- 1. engage in exploratory projects which can improve capabilities in information science.
- 2. acquire expertise in servicing the geographic information requirements of all sectors in the country.
- 3. establish standards and procedures in Geographic Information System (GIS) remote sensing, mapping and surveying.

SECTION 7. Period of Implementation - the modernization program under this Act shall be implemented over a period of ten (10) years. Provided, however, that payments for amortization of outstanding multi-year contract obligations incurred this Act may extend beyond this period.

SECTION 8. Appropriation for the NAMRIA Modernization Program. - The annual appropriation for the NAMRIA Modernization program shall include the amounts necessary to support the funding requirements for all modernization projects approved by congress

The funds to be appropriated by congress under this Act shall be treated as a district and separate budget item from the regular appropriations for the Department of Environment and Natural Resources and the NAMRIA and shall be administered by the Secretary of Environment and natural Resources.

SECTION 9. Multi year Contracts and Other Contractual Arrangements.

- (a) The Secretary of Environment and Natural Resources, pursuant to the NAMRIA Modernization Program projects and appropriation approved by Congress, may subject to the approval of the President, and consistent with the provisions of existing laws and regulations including those of the Commission on Audit and under such terms and conditions most favorable to the government, enter into multi-year contracts and other contractual arrangements.
- (b) Four multi-year contracts, Congress shall upon certification by the President make the corresponding appropriation for the ensuing fiscal year. Provided. That Congress shall appropriate only such funds as may be necessary to pay an unpaid amount where the funds appropriated for the current fiscal year is not sufficient or available to meet such payment in full or in part.
- (c) The Secretary of Environment and Natural Resources shall submit to the Chairman of the Senate Committee on Environment and Appropriations, copies of this multi-year contracts and other agreements to enable congress to appropriate funds.

SECTION 10. Procurement System. - In addition to the provisions of existing laws, rules and regulations regarding procurement and acquisition of equipment, the DENR and NAMRIA shall strengthen said system and procedures taking into account new requirements under the NAMRIA modernization program. The NAMRIA is hereby given the authority to strengthen its systems and procedures for equipment acquisition, taking into accounts new requirements under the NAMRIA modernization program.

SECTION 11. Tax Exemption. - The importation by NAMRIA of mapping and surveying material such as photogrammetric, cartographic, survey, data processing, remote sensing equipment and materials supplies, and spare parts which will be used actually, directly and exclusively in its operations shall be exempt from all forms of taxes, duties and other fees.

SECTION 12. Annual Reports. - The Administrator of the NAMRIA through the Secretary of the Department of Environment and Natural Resources (DENR), shall submit to the President and Congress, not later than the end of the first quarter of the succeeding year, an annual report containing the progress of the implementation of the modernization program under this Act.

SECTION 13. Austerity and Use of Savings. - Upon the approval of this Act, the Secretary of the Department of Environment and Natural Resources (DENR) and the NAMRIA Administrator, shall submit to Congress, within the first quarter of the succeeding year and every year thereafter a report on:

- (a) The amount of all unused and undisbursed funds remaining from previous DENR and NAMRIA appropriations; and
- (b) The amount of savings from austerity measures generated in the previous fiscal year.

The savings generated under this section are hereby authorized to be use to augment funds for the NAMRIA modernization program.

SECTION 14. Separability Clause. - If any provision of this Act shall be unconstitutional or invalid, the other provisions no otherwise affected shall remain in full force and effect.

SECTION 15. Repealing Clause. - All laws, executive orders, rules and regulations inconsistent with or contrary to this Act, are hereby deemed accordingly repealed or amended.

SECTION 16. Effectivity Clause. - This Act shall take effect after fifteen (15) days from its publication in at least two (2) newspapers of national circulation.

Approved.
