EXPLANATORY NOTE

This proposed measure seeks to provide funds for the rehabilitation and expansion of the waterworks system in the Municipality of Culaba, Province of Biliran to safeguard and ensure the health and safety of its population.

For several years now, the residents of this place have been plagued by the shortage of drinking water due to the inadequacy of the waterworks system. In addition to this, the government can also reduce expenses for health services if it can give the much needed waterworks facilities.

The early approval of this measure will give meaning to the Constitutional provision mandating the State to promote health consciousness and improve the living conditions of the people.
