House Bill No. 2602

Introduced by **REPRESENTATIVE IGNACIO T. ARROYO**

EXPLANATORY NOTE

It has been recognized, even by the Department of Health, that there is a severe shortage of medical doctors and licensed medical practitioners in far-flung and remote areas of several provinces. The shortage of medical assistance and, in many instances, the complete absence of medical programs have placed in critical danger the health of many of our citizens in remote barangays and municipalities. Ironically, some of the causes of illnesses that have caused deaths could have been averted had there been simple and basic medications.

This bill seeks to address the defeat we are experiencing in the battle against disease by reason of default. Very simply, the government is not there to fight for the health of its citizens. By establishing these barangay health centers where they are much needed, we shall be making good on our promise to deliver basic services to our people.

This is, furthermore, a recognition that there is no other way to address the problem but to bring the solution directly to its beneficiaries.

The cost of medication has become exorbitant and unreachable to many Filipinos. It is timely to be reminded of our Constitutional mandate to ensure the delivery of basic health services to the Filipinos.
