HOUSE BILL NO. 4233

Introduced by Honorable Roger G. Mercado

EXPLANATORY NOTE

This bill provides for the construction of a river control along Barangay Bogo in Maasin City, Province of Southern Leyte.

A river control along Barangay Bogo is urgently necessary for the prevention of soil erosion and siltation. It will solidify the soil structure and prevent the overflow of water during high tides and rainy season. Likewise, it will protect the local residents and rural folks against flooding and the attendant water-borne diseases which are detrimental to the health of the people in the area, especially the children.

The construction of the river control is definitely beneficial to the people, particularly the marginalized fishermen and the fisherfolks, who live near the river.

The approval of the bill is sincerely requested.
