THIRTEENTH CONGRESS
First Regular Session

House Bill No. 4335

INTRODUCED BY HON. DANILO E. SUAREZ

EXPLANATORY NOTE

The Philippine National Police, in its bid to modernize its services and professionalize its officials and personnel, needs the much-needed support in terms of appropriations from the national government. The PNP, no doubt, serves as the backbone of maintaining the peace and order situation in the whole country. But it cannot effectively perform its duties and react to distress or crisis situations in due time because of the slash and delays in the release of its appropriated budget.

Hence, this bill aims to plug this open loophole and provide the PNP a discretion to retain and use its collected revenues from its regulatory functions such as licensing, registration, and issuance of permits. It rationalizes the fees and charges of firearms, ammunition, spare parts, accessories, components, explosives, explosive ingredients, pyrotechnics and firecrackers to more realistic rates with consideration of industry concerns. It proposes to retain twenty percent (20%) of the total collections for firearms and explosive fees and charges to fund the direct and operational expenses of the Firearms and Explosives Division (FED) other than what is provided for in the General Appropriations Act. It is also being proposed that the total collections from firearms license card and permit to carry firearms outside of residence (PTCFOR) card be retained to fund the production cost of the said cards. Moreover, the proposed measure also provides that all interest earnings generated from cash bonds be retained by the PNP to fund its programs and projects, particularly its modernization program, its quick response activities and to extend immediate assistance to civilians and kin of police personnel hurt or affected during police operations.

These activities always suffer due to lack or delay in the release of funds. Consequently, the PNP image suffers and oftentimes, our lawmen are being projected as the villains. Hence, it is really very necessary to adjust the rates of fees and charges handled by the FED and modify the remittance and authority to use the FED collections and interest earnings to upgrade the PNP for its efficient and expeditious rendition of service to the public.

In view hereof, early passage of this bill is earnestly sought.
