Fifteenth Congress
First Regular Session

HOUSE BILL NO. 1326

Introduced by Honorable Rodante D. Marcoleta

EXPLANATORY NOTE

Hunger is defined as the painful sensation due to inadequate food intake. It is a form of severe food insecurity. Prolonged hunger leads to malnutrition. The 6th National Nutrition Survey showed that in 2003, malnutrition persisted among Filipinos. People go hungry because of insufficient food to eat and lack of money to buy food.

Further, the results of surveys conducted by the Social Weather Stations (SWS) reflect an increasing incidence of hunger in the country. The results of 2006 first quarter survey reveal that 16.9% of Filipino families experience hunger, with nothing to eat. This is the highest national proportion recorded since SWS began its survey series on hunger. Compared to the last quarter of 2005, there is an increase of 3.9% to 4.2% affecting an estimated 700,000 families.

This bill intensify efforts in addressing hunger among our citizenry particularly those belonging to families in absolute poverty, the homeless, and mendicants. Under the proposed measure, families will be selected based in the degree of food insecurity and vulnerability using the Food Insecurity and Vulnerability Information and Mapping Systems.

Lastly, this bill will promote the general welfare and safeguard the health and well-being of the nation's population by raising the levels of nutrition among low-income households and individuals. Its approval is highly recommended.
