**AN ACT
TO PROHIBIT UNATTENDED CHILDREN IN MOTOR VEHICLES**

EXPLANATORY NOTE

There is always that danger when people leave their children unattended inside their motor vehicle. This could result to injuries and even death in some situations. These injuries and deaths include heat stroke, a motor vehicle accidentally put in motion by a child, choking while inside a vehicle, being kidnapped, inhaling toxic fumes, activation of automatic power controls, or being trapped in the vehicle's trunk. But these things are preventable and predictable. It only takes vigilance to prevent such incidents from happening over and over.

This bill is being proposed to heed the urgent call instilling public awareness about the dangers of leaving children unattended inside motor vehicles. It is really sad that this is being practiced every day for a variety of reasons, not knowing of the risks involved. It must be remembered that once a child gets into a vehicle, they are not capable of getting out due to lack in developmental skills.

The authors believe that through legislation and education, the injuries and deaths caused by the dangerous practice of leaving children unattended in motor vehicles can be greatly reduced. Parents, relatives or guardians should always be made aware that unsupervised children inside a motor vehicle pose a grave threat to their safety and unnecessary emotional burden to their families.

In view of the foregoing, the immediate passage of this bill is highly encouraged.
