FIFTEENTH CONGRESS

Third Regular Session

House Bill No. 6447

INTRODUCED BY REPRESENTATIVE ARTHUR C. YAP

EXPLANATORY NOTE

This bill seeks to develop and expand public health infrastructure and services in the Philippines, utilizing a portion of the reserve funds of the Philippine Insurance Corporation, or the Philhealth.

This is a counterpart measure of Senate Bill No. 2653, authored by the Hon. Ralph G. Recto. Unlike the Senate Bill, however, the poorest municipalities and/or barangays, without, or without sufficient, public healthcare infrastructure and services, as determined by the Department of Health, Philhealth and the Department of Interior and Local Government (DILG), shall enjoy priority in the funding. Also, after its construction, the operations of such health facilities shall be operated by the Barangay Government under the joint supervision of the DOH and Philhealth.

It is a conceded fact that there are several gaps in the accessibility of free health care. This is the reality, most especially in the far flung countryside, wherein there are without or even no functional public health care systems and services. There is a grave need to construct public health care centers and clinics. And, these should be sufficiently equipped, not just with facilities and equipment, but with manpower, properly trained health workers.

Yet, the predicament of scarcity of funding by the National Government always hangs in the air.

Nevertheless, government owned and controlled corporations, like the Philhealth, (which is really owned by its members) can be sought to provide assistance. Philhealth reported a net reserve fund of more than P100 Billion. Fifty percent of this amount would go a long way in developing and expanding to the poorest of the poor Filipinos free public health infrastructure and services.

In view of the foregoing, the immediate passage of the bill is earnestly sought.
