**AN ACT
ESTABLISHING A HOSPITAL FOR TEACHERS AND THEIR DEPENDENTS,
APPROPRIATING FUNDS THEREFOR AND FOR OTHER PURPOSES**

EXPLANATORY NOTE

We have always recognized the important role of our teachers. They are our unsung heroes because despite the difficulties that confront their profession, they have remained steadfast in molding the values and character of our youth.

In fact, one of the most reliable and dedicated public servants are our teachers. Aside from their normal teaching duties, they are also being constantly called upon by officials of the local and national government to assist in various extra-curricular and civic activities which contribute to the welfare of the community and the country, most notable of which is when they perform election related duties. They have also gathered data for the National Statistics Office, despite going to the remotest of places.

The Family Code, under Article 218, also extends to teachers substitute and special parental authority. It expressly states that: "*the school, its administrators and teachers shall have special parental authority and responsibility over the minor child while under their supervision, instruction or custody.*"

It is also worthy to note that their normal teaching duties are no easy task. Statistics from the Department of Education would bear out that teacher-student

ratio in the elementary and secondary levels are now at 1:36 and 1:39, respectively.

As a result, our teachers are exposed to health risks, most common of which are ailments coming from work-related pharyngitis, hypertension, anemia, and hyperacidity, among others. There is therefore a need for the State to provide health facilities that specifically cater to the needs of teachers in view of the important role they play in educating our children and in the nation's progress.

The bill proposes the establishment of a special hospital, the PHILIPPINE TEACHERS' HOSPITAL, to be located in the National Capital Region as the primary medical facility for the hospitalization and medical care of teachers and their dependents. All regional hospitals shall also be required to establish a teachers' ward to provide medical services to teachers and their dependents residing outside the National Capital Region.

It is the hope of the authors that such hospital can provide comprehensive health care services to all teachers and their dependents and complement the existing package of services under the National Health Insurance Program.

In view of the foregoing, immediate approval of this bill is earnestly requested.
