#### **EXPLANATORY NOTE**

Education will always be expensive. In the Philippines, education that is free and accessible oftentimes lacks quality, making quality education almost a luxury for some, especially ordinary Filipinos. This current state is detrimental to our national development.

Education is an investment for the future. The kind of education that we can provide will be tantamount to the kind of future that we can hope for as a country, the kind of future that we are worthy of.

This bill seeks to provide assistance through scholarship programs to part-time and independent deserving students. It also aims to prescribe the powers and functions of the state agencies and institutions of higher education in the country in order to better facilitate and provide good quality education for everybody.
