HOUSE BILL NO. 74

Introduced by REP. ANTHONY G. DEL ROSARIO

EXPLANATORY NOTE

This bill seeks to expand the benefit package of the National Health Insurance Program, amending for the purpose Republic Act (RA) No. 7875 otherwise known as the "*National Health Insurance Act of 1995*."

Section 11 of Article XIII of the Constitution provides that the "*State shall adopt an integrated and comprehensive approach to health development which shall endeavour to make essential goods, health and other social service available to all the people at affordable cost.*"

Under this mandate, the government provides several health care programs to the people. Among these is the National Health Insurance Program created by RA 7875, as amended by RA 9241, designed to help the people pay for their health care services. Membership to this program has been quite useful to many Filipinos so it makes health care services more accessible and affordable. It somehow lessens the cost of hospitalization and other medical bill.

A review of the program would reveal, however, the need to strengthen the delivery of health care services to the people because the Philhealth care benefits under the program are limited. Philhealth does not cover the basic needs of health care services such as annual physical check-up. Also, it has little preventive health care function. The focus is a curative healthcare when a patient is too sick to rest at home and needs hospital confinement. Also, it does not cover outpatient consultation such as psychiatric cases, basic dental and optometric services. Finally, because of the limited cost of coverage, the health care benefits are not enough to cover expenses for serious diseases. Thus, being a Philhealth member alone is not sufficient. A member still needs private health maintenance organization (HMO) membership cards for a wider coverage but HMOs have many limitations, including the cost of premiums.

In this light, this measure seeks to address the program coverage limitations by expanding the Philhealth benefit package to include health services such as annual physical check-up, outpatient consultation, dental and optometric service and bigger health care coverage. Hopefully, this measure will answer the growing imperative to make more available, and accessible, appropriate and adequate health care service at affordable and reasonable cost to every Filipino.

In view of the foregoing, immediate approval of this bill is highly recommended.
