SIXTEENTH CONGRESS
First Regular Session

H.B. No. 228

Introduced by **HONORABLE CINCHONA CRUZ-GONZALES**

EXPLANATORY NOTE

As of 2006, statistics shows that over 27.2 million Filipinos are below poverty line and who are subsisting on less than 41 pesos per day. It is also the poorest Filipinos that have infant mortality rate of 42 per 1,000 births, while the higher income groups are at 19 per 1,000 births. The same trend can be observed in maternal mortality rates. The lowest income groups are also 1.4 times more likely to be positive for tuberculosis based on chest x-ray examination compared to the highest income groups.

Despite the government's efforts to bring health care closer to Filipinos by dispersing health workers and services especially in remote areas, the disparities in health outcomes still persist. Health inequity remains a foremost health issue in the Philippines, and as such, a change in health care system has become imperative to achieve effective and universal health care.

This measure provides for automatic enrollment of all Filipinos as opposed to the current scheme of enrollment in PhilHealth. It seeks to have a mandatory universal health coverage by immediate and automatic enrollment of all Filipinos which shall be funded by the national government through the inclusion of the required contribution in the General Appropriations Act annually.

In view of the foregoing, early passage of this bill is earnestly requested.
