

Republic of the Philippines
HOUSE OF REPRESENTATIVES

SIXTEENTH CONGRESS
First Regular Session

HOUSE BILL NO. 369

Introduced by: **REP. RAUL V. DEL MAR**

EXPLANATORY NOTE

The attached bill seeks the construction and operation of an appropriate Modern Mass Transport System in the City of Cebu and Metro Cebu.

Current economic activities in the City of Cebu and Metro Cebu put in sharp focus the development potentials of the area towards making it a prime growth center and more. This kind of potential and this kind of development, however, give rise to some areas of concern. With the Cebu City and Metro Cebu's projected growth, even the construction and improvement of basic infrastructures: roads, bridges and flood control facilities in selected areas to alleviate the serious traffic situation now obtaining will not be adequate in the near future, given the increasing and widening areas of traffic.

The common perception is that the traffic situation in the City of Cebu and Metro Cebu, considering the economic growth trends, population explosion rates and migration factors, will reach a level where a modern mass transit system must be put in place. It is in this context that an appropriate modern Mass Transport System is proposed, a mass transport scheme that realistically looks into the "not too instant future", anticipating the requirements of an ever expanding metropolis.

It may be stressed that this bill passed on third and final reading in the House of Representatives during the Thirteenth Congress but was not approved by the Senate, for lack of time upon congressional adjournment.

Approval of the bill is therefore earnestly recommended.
