HOUSE BILL NO. **892**

Introduced by *Rep. Winston "Winnie" Castelo*

EXPLANATORY NOTE

Santa Lucia General Hospital is in dire need of upgrading to the next higher level or status as a health care delivery system that is bound to protect and promote the right to health of the people within its reach notwithstanding instilling health consciousness among them.

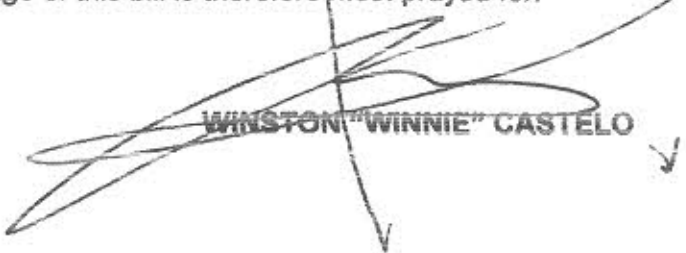

This is graphically spelled out in Section 15 of State Policies under Article II of the Constitution.

The less-than-satisfactory performance of a hospital has become a mathematical problem and therefore requires only a simple mathematical solution. The growing population today requires that the limitations inherent in the administration and operation of the hospital as it caters health services to its clientele ought to be solved with a corresponding view to upgrading its present level or status one notch higher.

It is the intention of this bill to upgrade the present Santa Lucia General Hospital and the prayer that sufficient funds be appropriated therefore to enable to serve its constituents better and at par with private hospital counterparts.

After all, it is the commitment of government to provide health services to the poor, to the indigents and a larger segment within the poverty line who cannot truly afford the costs in private hospitals.

The immediate passage of this bill is therefore most prayed for.
