AN ACT
TO ESTABLISH A PROGRAM TO AWARD INNOVATION PRIZES TO
INDIVIDUALS AND ENTITIES FOR RESEARCHING AND DEVELOPING
INNOVATIVE TECHNOLOGIES, AND FOR OTHER PURPOSES

EXPLANATORY NOTE

The Constitution, Article 2, Section 20 provides that:

SEC. 20. The State recognizes the indispensable role of the private sector, encourages private enterprise, and provides incentives to needed investments.

Aside from being a country rich in cultural heritage and abundant natural resources, the Philippines has also been blessed with innovative human resources. All over the world, countless Filipinos have won and have continually been recognized for their ingenuity. But sad to say, we are not giving due recognition to our country's bright minds due to lack of a solid program to recognize their achievements in the field of research and development here in our country. This has forced our inventors and innovators to look elsewhere to gain recognition resulting in our inventions being claimed by the foreign countries which recognized them.

There is an urgent need, therefore, to establish a sustainable recognition program that will encourage our inventors and innovators to develop new products and technologies that can be produced and exported all over the world.

This not only translates in helping our ailing economy, but would once again give our local minds their due for their countless achievements in the field of research and development.

This proposed measure seeks to mandate the Department of Trade and Industry to establish a National Innovation Prizes Board which shall spearhead a program to solicit participation from various sectors of our country, encourage a competitive research and development drive and recognize and reward the best new inventions and innovations which we can truly call authentic Filipino.

Due to the foregoing reasons, the immediate passage into law of this measure is earnestly requested.
