House Bill No. **2327**

Introduced by Honorable Lucy Marie Torres-Gomez

EXPLANATORY NOTE

State policy dictates the need to strengthen the fight of the worker in the sugar industry to their just share in the fruits of production by augmenting their income and among other schemes, institutionalizing the mechanism among the partners in the sugar industry to enable the worker and their families to enjoy a decent living;

It is therefore high time to revisit the existing policies, plans and programs that cover this ailing area of our agricultural industry with the aim to balance the interest of the various stakeholders.

The main focused should be the policy of the state to ensure the viability of the sugar industry and provide the workers with living wages, incentives for productivity and equitable distribution of income and wealth along the imperatives of economic and social development;

In this regard, there is a need to amend certain provisions of Republic Act No. 6982, or the social Amelioration Law which institutionalizes the social amelioration program in the Philippines through the provisions of workers' benefits, and established the tripartite mechanism for the participation of the planters, millers and workers in the management of the Social Amelioration Fund.

Under Republic Act No. 6982, the implementation of the program is financed through the collection of Ten Pesos (Php10.00) for every picul of sugar which, under the implementing Rules and Regulations formulated by the Secretary of Labor, was converted to Seven Pesos and Ninety Centavos (Php 7.90513) for every LKG bag of sugar produced by each sugarcane planters.

Of the amount collected, 80's is utilized for the contribution of a productivity-based cash bonus to the laborers, while 20's is allotted for socio-economic related projects, specifically:

- 9% for socio-economic projects;
- 5% for death benefit program;
- 3% for maternity benefits program;

- 3% for administrative expenses of the Sugar Tripartite Council (STC), District Tripartite Council (DTC) and the Bureau of Workers with Special Concerns (BWSC).

There is thus need for the law to be amended to make it more dynamic and adaptive to the changing times. Hence, a simple conversion into metric system from picul to LKG. Which is an internationally-accepted unit of measurement, while maintaining the P10-lien, will automatically increase the fund.

Notably, **health , medical and educational projects** are excluded from the 'socio-economic projects' provides for under Section 10b of the said Act. Further, only 9% is allocated for the said purpose. Previous studies show that many of the sugar workers and their children are still fraught with poor health and are unable to send most children to schools.

Definitely, a realignment of the foregoing allotted percentage will not debilitate the other area of coverage of this fund.

In the light of the foregoing, there is an imperative need to amend certain provisions of RA 6982.
