SIXTEENTH CONGRESS

First Regular Session

HOUSE BILL NO. **3108**

Introduced by: **HONORABLE MARCELINO "MARCY" R. TEODORO**

EXPLANATORY NOTE

This bill seeks to establish the Philippine Blood Disease and Transfusion Center (Blood Center), which is envisioned to offer comprehensive care for patients with blood disorders, and to provide transfusion services to the Filipino people.

The Blood Center is envisioned to provide capacity for safe blood and blood products, augmenting the medical services provided by hospitals and partner agencies. It shall also be the lead hospital in the training and teaching of medical and paramedical professionals regarding blood disease and transfusion medicine.

Further, the Blood Center is also envisioned to provide the Filipino people with the latest state-of-the-art in the diagnosis, management and treatment of hematologic disorders and shall serve as a referral laboratory center for all hematologic diseases.

Republic Act No. (RA) 7719 or the National Blood Services Act of 1994 and the consequent strengthening of voluntary blood services nationwide came on the heels of unprecedented need for blood and blood products secondary to inevitable epidemiologic shift towards rising incidence of dengue fever and its hemorrhagic forms, the increasing threat of HIV and other blood borne infections. RA 7719 is aligned with the national goal of drastically reducing maternal deaths through the assurance of adequate supply of blood.

This bill will complement RA 7719 as it aims to establish the Philippine Blood Disease and Transfusion Center, a government corporate institution under the direct supervision of the Department of Health for purposes of policy direction and control.

In view of the foregoing considerations, approval of this bill is earnestly sought.
