SIXTEENTH CONGRESS
First Regular Session

HOUSE BILL NO. **3450**

**Introduced by Honorable Anthony M. Bravo and Honorable
Cresente C. Paez**

EXPLANATORY NOTE

A study by the World Health Organization (WHO) and the World Bank finds that traffic fatalities, including those caused by alcohol, are a serious world health problem that is often overlooked. One in every 50 deaths worldwide is associated with road accidents, the study found. Each year, 1.2 million drivers, passengers, cyclists, and pedestrians are killed in traffic crashes. By 2020, traffic deaths are expected to increase by 80 percent as hundreds of millions of cars are added to the roads. The World Health Organization lists road accidents as the "second leading cause" of death worldwide among the young aged 5 to 29. An estimated 40 percent of these accidents are attributed to driving under the influence of liquor or narcotics (DUI), or drunk driving. The WHO says those road accidents cause 1.2 million deaths and 50 million injuries around the world each year. Some 480,000 of these deaths and 20 million of the injured are caused by drunk driving.

Most laws against drunk driving are punitive in nature. This legislation focuses on the practical side of prevention. By giving patrons of establishments that serve alcoholic drinks the option of an alternative transportation; driving under the influence incidents can be avoided.
