

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City, Metro Manila

SIXTEENTH CONGRESS

First Regular Session

House Bill No. 3661

Introduced by Rep. EVELIO R. LEONARDIA

EXPLANATORY NOTE

One of the operative principles in the local government's decentralization is that the national government shall ensure that there shall be a continuing improvement of the performance of local government units and the quality of community life.

The sharing of public burden especially in the matter of mutual cooperation in the conservative use of public funds, with the assistance by the National Government (NG) o the budget of the local government unit (LGU) in terms of the latter's savings in infrastructures' expenditures, may be realized when the complete stretch of major road arteries which are partly or commonly under the domain of both the LGU and NG shall all be integrally and wholly be under a system that shall harmonize both their development thrusts.

Moreover, the whole and complete stretch of the major road arteries which are connected to the already existing, or leading towards, the national roads will eventually result to the network of national roads that may entail further road improvements falling under the capacity of the NG such as the building of flyover or the like, thus, assurably creating efficiency and orderly flow in the traffic that can boost and augment community interaction resulting to economic development and upliftment in living conditions benefiting the LGUs in particular and the country in general.

As such, the approval of this Bill is earnestly sought.
