First Regular Session

House Bill No. 4300

Introduced by: REPRESENTATIVE ERIC L. OLIVAREZ

EXPLANATORY NOTE

Education is the only effective weapon we have against poverty. It is through education that the people learn about their fundamental rights and make well-informed decisions. It is decent education that fuels people to be vigilant in defending their place, status and stance in society and in transforming the nation into a better-functioning government. In short, a country with well-educated citizens is easily lead towards progress and development.

That being said, it is just proper that academic excellence be given high regard. In a nation where poverty is very prevalent, students who do well in school and who strive to finish college in order to help themselves and their families, despite the hardships they are experiencing at present brought about by lack of resources and means, shall not go unnoticed or overlooked. Rather, their brilliance coupled with perseverance and undying fighting spirit must be rewarded and their enthusiasm to learn must be further encouraged.

Every student who performs well academically most definitely possesses an intense passion for learning and love for knowledge. This kind of young people are the nation's hope towards better governance and leadership. This kind of students who genuinely pursue excellence in what they do will be and should be the future leaders of our country. And it is the State's responsibility to make sure that these young intelligent people get an opportunity to finish their studies regardless of their station in life. It is the state's duty, as it is also

for its own benefit, to ensure that such brilliant minds will not be wasted just because of financial restraints.

Through this bill, the top 3 graduating high school students, the best among the best in every graduating batch so to speak, shall be automatically given scholarship grants in the form of cash incentives to help them advance to college/tertiary level, the matriculation for which, as we all know, is getting more expensive by the year.

Through this simple cash incentive, the deserving students will have sufficient stepping stone to pursue the career they want and reach for their dreams.

It is for this reason that the approval of this bill is being sought.
