HOUSE BILL NO. 4761

Introduced by **Representative Frederick F. Abueg**

EXPLANATORY NOTE

This House Bill was previously filed in the Sixteenth Congress as House Bill No. 5284. It was first read on December 16, 2014 and was referred to the Committee on Natural Resources.

The proposed bill seeks to authorize the Community Environment and Natural Resources Office (CENRO) of the Department of Environment and Natural Resources (DENR), having jurisdiction over the parcel subject of the application, to issue tree-cutting permits to landowners for the cutting, gathering and utilization of naturally grown trees in private and/or titled lands subject to the guidelines of the DENR.

Moreover, this bill also aims to expedite the process of cutting dead and infected trees which pose danger to the lives and properties of owners and to provide them the freedom, within their titled lots, to make use of naturally grown trees for personal and private purposes only. If the cutting is inevitable and only the last resort in the implementation of a project or construction of an infrastructure within the private land of the owner, this bill likewise addresses such concern.

Lastly, while we take cognizance of the issuance of Executive Order (E.O.) No. 23 by President Benigno S. Aquino III which declared a moratorium on the cutting of trees to protect the remaining forest cover areas of the country, the safety of the citizens paired with the necessity to cut trees within private and/or titled lands for personal purposes are often overlooked. Additionally, since the current requisite prior to the issuance of tree-cutting permit involves joint efforts of the local government

units concerned, DENR Regional Office and/or the DENR Central Office, the pace is rather slow resulting to a bottleneck in these offices and non-issuance of permits to well-intentioned applications.

In view of the foregoing, the approval of this bill is earnestly recommended.
