HOUSE OF REPRESENTATIVES
Quezon City

SEVENTEENTH CONGRESS
First Regular Session

House Bill No. 5465

Introduced by **MAGDALO Party-List Representative**
HON. GARY C. ALEJANO

EXPLANATORY NOTE

During the last two decades, the rapid development of the marine profession as well as the marine industry, both in the academic and technological aspects, has made the requirements of future marine officers, per P.D. No. 97, quite obsolete. The advances in the international field have been more phenomenal among the Western countries who are members of the International Marine Organization (IMO), with the Philippines lagging behind.

Of utmost concern to the country is the state of affairs of its domestic or coastwise shipping industry where there are numerous vessels with lower than 200 gross tons capacity that are manned by unqualified seafarers. Based from the reports of sea disasters, these accidents may just have been due to human errors/negligence, which is primarily due to the lack of sound and solid education on the field despite the years of actual sailing.

The age of computerization and automation only heightens the problem. Procedures and equipment of modern merchant vessels have not only increased in complexities but have been constantly improving by the adoption of new developments in science and technology further promoting efficiency and safety of operations. We cannot be caught flat-footed. We, therefore, have to upgrade not just the techniques, but most of all, the basic academic and hands-on experience qualifications.

Stiffer competition with our Asian neighbors and Eastern European countries only emphasizes our lack of these essential pre-requisites. For this reason, we need to use our naval vessels when they are not engaged in emergencies for the training of our future deck officer, engineers and crewmen apart from the traditional vessels that lend them apprenticeship training.

In view of the foregoing, the immediate approval of this bill is earnestly sought.
