

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City

SEVENTEENTH CONGRESS
Second Regular Session

HOUSE BILL NO. **6733**

Introduced by Representative Michael L. Romero

EXPLANATORY NOTE

The republic of the Philippines has a very promising **medical tourism industry**, these sectors include health professionals, quality health care and insurance providers, tourism planners, airline and travel executives patient safety workers. Also involved are sectors in finance, real estate, retirement planning, communications and advertising, as well as those in information technology. The timely, relevant and strategic inputs of all concerned sectors lead to increased Philippine industry competitiveness amidst the increasing opportunities in the field.

Countries all over the world are thinking of viable means to reduce their costs of delivering quality and sufficient medical and health care for their public. The practice of providing international accreditation to qualified hospitals and facilities has also been set, and thus, ensuring that more qualified players are able to get into medical tourism is a concern.

In recent years, the Philippines has gained considerable momentum in this area and this pace can only be further improved through sustained and focused attention for its growth.

It has been noted that the Philippines is a natural provider of medical tourism, with the high level of competence of its medical professionals, their ability to communicate well in English, the upgrade of equipment and infrastructure to provide well-priced services, as well as the innate hospitality of the Filipino people.

This House Bill seeks to foster the continuity and expansion of a responsive medical tourism industry.

Thus, the early passage of this bill is earnestly requested.
