HOUSE BILL NO. **7066**

Introduced by Honorable Mark O. Go

EXPLANATORY NOTE

A golf caddie is one who assists a golfer by carrying his bag, clubs and other equipment, and in most cases, gives insightful advice and moral support to a golf player. He is usually aware of the challenges and obstacles within a particular golf course and also knowledgeable with the best strategy in playing it which includes determination of overall yardage, appropriate pin placements and club selection.

As we are aware of, a caddie is not usually an employee of a private club or resort. "They are classified as an "independent contractor," meaning that he or she is basically self-employed and does not receive any benefits or perks from his association with the club." In some clubs and resorts, caddie programs are being implemented, however, benefits are rarely offered. Considering the nature of their work, these independent workers are vulnerable to some health hazards

There are around ninety three (93) golf courses in the country with concentration in the Luzon area. And there are more than a hundred caddies who worked in a particular golf club excluding other service workers. These caddies undergo a certain training usually provided by the club management and are subject to the club's rules and regulation on caddie service.

This bill seeks to provide health, retirement and other benefits to our golf caddies and other independent workers who render their services to the club and its players by ensuring their enrolment and coverage under the SSS, Pag-IBIG and PhilHealth.

Hence, in order to give assistance and relief to these particular members of our informal sector, immediate consideration and approval of this proposed measure is earnestly sought.
