HOUSE BILL NO. 7947

Introduced by: **"KUYA" JOSE ANTONIO R. SY-ALVARADO**

EXPLANATORY NOTE

Art. 13 Sec. 12 of the Constitution provides that the State shall establish and maintain an effective food and drug regulatory system and undertake appropriate health, manpower development and research which is responsive to the country's health needs and problems.

According to mayoclinic.org, Hepatitis C is a viral infection that causes liver inflammation, sometimes leading to serious liver damage. The hepatitis C virus (HCV) spreads to contaminated blood.

There is no known cure for this infection. The State should provide programs to prevent emergency response employees from acquiring such disease. This bill seeks to establish a system, training, protocol and scientific research and medical treatment for this virus so that our fire fighters, paramedics, emergency medical technicians and emergency response personnel will be able to deploy their functions without sacrificing their precious health.

Hence, this proposal is submitted for consideration.
