9208
House Bill No. _____

Introduced by HON. DANILO E. SUAREZ

EXPLANATORY NOTE

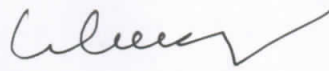

The right to health is one of the rights safeguarded by our 1987 Constitution in Article II Section 15. With this, the government is mandated to ensure that citizens must have access to quality health services and health facilities all over the country.

The Quezon Medical Center (QMC) has been catering to residents of Quezon and nearby provinces for more than 10 years. Located at the capital of the province, the QMC serves as a tertiary public hospital that handles illnesses requiring medical specialization and services using modern equipment. Today, with only a two hundred (200) bed capacity since its establishment, the hospital accommodates up to six hundred (600) patients at one time.

The Local Government of Quezon has been providing support to the hospital. However, this Representation believes that, more than that, there is a need to upgrade the facility and its services to keep up with the health care demands in the city, thereby allowing it to be more competent and responsive in providing health care and be at par with standards set nationally and globally.

This bill therefore seeks to address this lamentable situation by converting the hospital into a regional hospital and increase its bed capacity to three hundred (300). Through this, it is hoped that many patients can access quality and competent health care services and the general health of the population be improved.

In view of the foregoing, the approval of this bill is earnestly sought.
