

HOUSE OF REPRESENTATIVES

House Bill No. 295

Introduced by Representative Victor A. Yap

EXPLANATORY NOTE

Emergency medical services are crucial in avoiding complications before hospital service is available. When emergency care or medicine is provided to a victim prior to being transported to a hospital, their survival rate becomes much higher. Thus, we must endeavor to cultivate and maintain an environment conducive to the practice of pre-hospital emergency care, and institute a standard system of emergency medical services in the country.

This bill seeks to create the Emergency Medical Services Systems Council that shall develop national standards and protocols to be observed by emergency medical services personnel. The measure also aims to ensure that there are adequate emergency medical services personnel in the country by creating a minimum number of plantilla positions for them in government hospitals and health facilities.

Furthermore, the proposed measure mandates local government units to ensure the availability of adequate emergency transport vehicles or ambulances with qualified emergency medical services personnel, and to establish dispatch centers where constituents can call for all cases of emergencies. It also seeks to adopt a free national emergency 911 hotline number to enable the public to immediately access emergency medical services. This bill ultimately aims to maximize the capability and potential of emergency medical services personnel in order to save more lives.

In view of the foregoing, the immediate passage of this bill is earnestly sought.

VICTOR A. YAP

Representative, 2nd District of Tarlac

HOUSE OF REPRESENTATIVES
