EXPLANATORY NOTE

Republic Act No. 9136 or the Electric Power Reform Act (EPIRA) of 2001 which liberalized and privatized the power industry was aimed to secure the power supply and reduce the cost of electricity through greater competition and efficiency. It was intended to free the government from subsidizing capital-intensive power projects and allow instead the private sector to put up the same. Thus, the law directed the government to privatize or sell its power generation assets and the capacities it contracted with Independent Power Producers (IPPs).

In Mindanao, National Power Corporation's (NPC) Agus and Pulangui hydroelectric power complexes, located in Lanao Del Sur and Bukidnon provinces, respectively, has been exempted from privatization and were given ten (10)-year reprieve from the passage of EPIRA; they continue to bring low power rates in Mindanao.

The EPIRA provided that the ownership of the Agus and Pulangui power complexes was to be transferred to the Power Sector Assets and Liabilities Management Corp. (PSALM), the state agency which handles the privatization of National Power Corporation's (NPC) assets. They will continue to be, however, operated by the NPC. After the lapse of ten (10) years, the privatization of the Agus and Pulangui complexes is left to the discretion of PSALM, in consultation with Congress.

It has been foreseen that the takeover by private sector groups or Independent Power Producers (IPP) of the Agus and Pulangui power complexes will increase the price of power in Mindanao as private investors are profit oriented and are propelled by business interests and profits, hence, an increase in the price of power is inevitable if they should acquire the power plants and take over its management and operations. Keeping the hydro plants in government will certainly moderate any price adjustments of power as the Pulangui and Angus plants will give a mix to the price of power that will keep it lower.

The policy of the State to promote the economic development of the country, particularly the Mindanao region, and the availability of electricity at reasonable cost as a catalyst for economic growth and progress must be recognized.

It is, therefore, imperative for the National Government to promote development in Mindanao by the establishment of the dependable and reliable supply of electric power through the acquisition of generation assets of PSALM located in Agus and Pulangui Hydropower Complexes by the direct stakeholders from the Mindanao region to assure that the electricity rates are reflective of the true cost of power.

To attain these ends, it becomes necessary for an organized corporate entity in Mindanao to be created. And this is what this bill seeks to achieve. The proposed Mindanao Power Corporation, which is a standalone government-owned and controlled corporation, shall be empowered to acquire the Angus-Pulangui hydro complexes for its rehabilitation, operation, management and maintenance.

Acquisition by the Mindanao Power Corporation of the Agus-Pulangui Hydro Complexes would give beneficial resolution to the Mindanao stakeholders as it would potentially gain all the benefits derived from privatization, that is, effective and efficient administration of the power industry in the region; and, security against the skyrocketing of electric power rates.

Furthermore, the creation of Mindanao Power Corporation as an organized corporate entity in Mindanao is necessary to assure the full development and maximized

utilization of the power resources of the region, ensure transparent and reasonable prices of electricity in a regime of free and fair competition, protect the public interest, and provide full public accountability to achieve greater operational and economic efficiency in Mindanao.

The passage of the bill is earnestly sought.
