**AN ACT AUTHORIZING THE COMMISSION ON ELECTIONS TO USE
AND IMPLEMENT AN AUTOMATED AND ONLINE SYSTEM FOR
VOTER REGISTRATION, PROVIDING FUNDS THEREFOR, AND FOR
OTHER PURPOSES**

EXPLANATORY NOTE

Suffrage, or the right to vote, is the hallmark of a vibrant democracy. It is through which that the people, in their sovereign capacity and will, vest upon their chosen few the power, duty, and privilege to serve and govern. The right of suffrage, however, is a franchise subject to State regulation. While it lies in the heart of a truly democratic State, its exercise is conditioned on the fulfilment of a procedural limitation—that of registration. The seeming lengthy and tedious processes involved in voter registration however may prove to be a deterrent for many from registering as voters or updating their registration records. As we herald the Fourth Industrial Revolution, technological advancements and innovations present an abundant opportunity for the State to address this issue by lending more efficiency, economy, and accessibility to voter registration processes.

This bill seeks to take advantage of these technological advances by mandating the Commission on Elections, as far as practicable, to adopt, design and use an automated and online system for voter registration that enables the electronic and online filing and processing of the application for voter registration, transfer of registration, reactivation, correction of voter registration entries and such other requests and processes relative to the voter's registration and records.

Indeed, a more convenient, efficient, and accessible registration process encourages more people to register. This further increases the possibility of higher voter participation in the elections because there is nothing healthier for a democratic state than to have citizens who are informed, actively participating in its democratic processes, and truly engaged in charting the course of its destiny.

In view of the foregoing, the immediate passage of this bill is earnestly sought.
