**EXPLANATORY NOTE**

The Armed Forces of the Philippines (AFP) is responsible for upholding the sovereignty of the country, supporting its Constitution, and defending its territory against all enemies. As such, the assignments of our troops vary. Their duties and responsibilities take them to different parts of the country where they are only tied to their respective nearest brigade or command. With these various assignments and often far locations, tending to the wounded or ill becomes difficult. And for those not so fortunate, a high price is paid.

To ensure the preservation of life and the avoidance of unfortunate but otherwise preventable situations, there is a need for the establishment of a hospital-grade clinic in all brigade or command posts of the AFP. This way, our troops need not go far in order to receive life-saving-time-is-of-the-essence medical care that would be otherwise available only in a hospital far from their location.

The budget necessary to make this possible is small compared to the heroism and dedication of our men in uniform. This will surely boost their morale and is definitely a good gesture of the government's faith and gratitude for their sacrifices.

Thus, approval of this bill is earnestly sought.
