HOUSE BILL NO. **6536**

Introduced by Representative Stephen James T. Tan

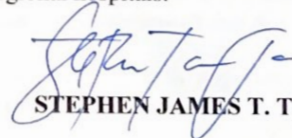

AN ACT
PROVIDING FOR THE MODERNIZATION OF MATUGUINAO RURAL
HEALTH UNIT INTO A SUPER HEALTH CENTER IN MATUGUINAO,
SAMAR, UNDER THE DIRECT SUPERVISION AND CONTROL OF THE
DEPARTMENT OF HEALTH, AND APPROPRIATING FUNDS THEREFOR

EXPLANATORY NOTE

The 1987 Philippine Constitution, in Section 15 Article III, declares that “*the State shall protect and promote the right to health of the people and instill health consciousness among them*”. Section 11, Article XIII thereof also provides that “*The State shall adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable cost. There shall be a priority for the needs of the underprivileged sick, elderly, disabled, women, and children. The State shall endeavor to provide free medical care to paupers.*”

Currently, Samar has seven (7) hospitals, three (3) infirmaries¹, and 30 rural health units. The hospital bed-to-population ratio is 1:2,514 while the rural health units-to-population ratio is 1:21,371.² This is extremely problematic as per the Department of Health – to meet the health needs of the population, the current supply of hospital beds must increase to 2.7 per 1,000 population.³ Health stations, Rural Health Units (RHUs), and Health Centers (HCs) are supposedly the entry points of individuals, families, and communities into the health system. In practice, however, patients go directly to hospitals and other specialized clinics, resulting in large health system inefficiencies.

Thus, this bill seeks to rehabilitate, upgrade and convert Matuguinao Rural Health Unit into a modern Super Health Center that will cater to the medical needs of the residents and its neighboring towns. This bill aims to provide a higher standard of care than a regular rural health center meant to address the demands of the community considering the ongoing public health issues, such as lack of access to better healthcare facilities, and prevent the rise in hospital occupancy in regional hospitals.
