NINETEENTH CONGRESS
First Regular Session

House Bill No. 8512

Introduced by Hon. MARIA VANESSA C. AUMENTADO
Bohol – 2nd District

EXPLANATORY NOTE

This bill seeks to declare the Marine, Mangrove, Foreshore Areas, Island and Islets of Inabanga, Buenavista, Getafe, Ubay, President Carlos P. Garcia, Candijay, Anda and Mabini, all in the Province of Bohol as protected landscapes and seascapes under the National Integrated Protected Areas System (NIPAS) as amended.

The island province of Bohol has a very rich marine life and ecosystem. It is blessed with undersea wonders such as a very rare geological formation the Danajon Double Barrier Reef and also its five major ecosystem - fringing mangrove, extensive coral reefs, seagrass beds, sargassum seaweed beds and deep sea which are present in the Bohol Marine Triangle. The clear, turquoise waters surrounding the islands harbor a dazzling array of marine life, including nearly 145 coral species, 13 of the 22 known marine mammal species and the endangered and vulnerable species like the giant clam, manta ray and whale shark.

Bohol has one of the highest biological diverse mangrove forest ecosystems around its river systems, estuaries and off shore islands. It has the biggest mangrove area consisting of both natural growth and plantation stands found in the municipalities of Inabanga, Buenavista, Getafe, Talibon, Bien Unido, Carlos P. Garcia (CPG), Ubay, Mabini, Anda and Candijay. In fact, the biggest man-made mangrove plantation in South East Asia can be found in Banacon, Getafe, Bohol.

The most important role of the dense mangrove of the province is as a source of food, and products for selling such as firewood, charcoal, fiber, wine, vinegar, tannin, among others. It also serve as the breeding and feeding areas for fishes, fish clams and crustaceans. Most of all, it provide protection against strong waves and storm surges.

However, Bohol's marine resources are under threat from siltation, coastal land development and conversion, discharge of toxic materials and improper wastes disposal, pollutants, illegal fishing and destructive harvesting activities. Also, the unabated human consumption has resulted in over harvesting of marine life. More so, the reclamation of land and other destructive human activities contributed to the decline and depletion of Bohol's marine life.

Cognizant of the profound impact of human activities on all components of the natural environment particularly the effect of increasing population, resource, exploitation and industrial advancement; recognizing the critical importance of protecting and maintaining the natural and physical diversities of the environment notably areas of unique biological significance in order to sustain life; taking into account the socio-cultural, economic, aesthetic and environmental values of the ecosystem of the island province of Bohol and its environs, particularly its marine, mangrove, foreshore areas, island and islets, and its seascape resource, the diversity of its flora and fauna; and finally, in pursuit of the State's duty to protect and advance the right of the people to a balance and healthful ecology in accordance with the rhythm and harmony of nature, it is hereby declared the policy of the State to secure for the Filipino people to present and future generations, the protection and conservation of Marine, Mangrove, Foreshore Areas, Island and Islets of Inabanga, Buenavista, Getafe, Ubay, President Carlos P. Garcia, Mabini, Anda, and Candijay all in the Province of Bohol as a protected area under the category of Protected Landscape and Seascape in accordance with Republic Act No. 7586 or the "National Integrated Protected Areas System (NIPAS) Act, as amended by R.A. No. 11038 or the "Expanded National Integrated Protected Areas System Act of 2018" and the commitments under various international agreements to which the Philippines is a signatory.

It is thus, that approval of this proposed measure is earnestly requested.
