HOUSE BILL NO. **11033**

Introduced by Honorable Luz V. Mercado

EXPLANATORY NOTE

The National Science High School system has been a proven method of improving the education of high school students in many places. However, the Province of Southern Leyte is being deprived of a national science high school campus.

For this reason, the improvement in high school students' education under a national science high school could not be easily availed by the students in Southern Leyte considering that the said province is hundreds of kilometers away from the nearest science high school.

This bill will propose the creation of a national science high school in Maasin City to provide the Province of Southern Leyte a national science high school campus.

In view thereof, approval of this bill is hereby earnestly requested.
