HOUSE BILL NO. 132

Introduced by Representative Arnan C. Panaligan

EXPLANATORY NOTE

The Verde Island Passage (VIP), hailed by marine scientists as the “center of the center of marine shore fish biodiversity”, spanning across the provinces of Batangas, Marinduque, Occidental Mindoro, Oriental Mindoro, and Romblon, is host to over 1,700 marine species, including reef-building corals, endemic fish, and critically endangered megafauna such as whale sharks, sea turtles, and dugongs.

This narrow but biologically rich marine corridor is not only a global biodiversity hotspot but also a critical lifeline for over two million Filipinos who depend directly on its resources for food security, livelihood, tourism, and disaster resilience. The thriving ecotourism and fisheries sectors in the VIP contribute significantly to local and regional economies.

However, this vital seascape faces escalating threats from a range of human-induced and environmental pressures such as overfishing, plastic and chemical pollution, coastal development, and the potential expansion of fossil fuel and mining operations that demand urgent legislative action. Moreover, the VIP lies within a region highly vulnerable to the impacts of climate change like rising sea temperatures, ocean acidification, and stronger typhoons that further endanger its fragile ecosystems.

Clearly, the VIP is under increasing threat. A 2013 scientific study projects that climate change alone could reduce the area’s live coral cover by up to 22% and fish abundance by as much as 54%, due to rising sea temperatures and intensified storm activity¹. The catastrophic 2023 MT *Princess Empress* oil spill, which released nearly 900,000 liters of industrial oil off Oriental Mindoro, devastated critical marine habitats and caused an estimated ₱3.8 billion in environmental and

economic losses^{2 3}. Moreover, the proliferation of fossil fuel infrastructure, including proposed gas terminals and plants near the VIP, has raised alarm among scientists and environmental advocates for their potential to increase marine traffic, thermal pollution, and chemical discharge in this fragile ecosystem. Furthermore, illegal and destructive fishing methods, such as dynamite and cyanide use, continue to deplete fish stocks and damage coral reefs, while untreated sewage and agricultural runoff from nearby provinces further pollute the water⁴. Without immediate intervention, these compounded threats could irreversibly compromise the biodiversity and ecological integrity of the Verde Island Passage. Placing it at risk not only detrimental to the marine life but also to millions of Filipinos who depend on it for food, livelihood, and climate resilience.

To address this concerns, this legislative measure seeks to establish the Verde Island Passage as a Protected Seascape under the National Integrated Protected Areas System (NIPAS), pursuant to the State's duty under Article II, Section 16 of the 1987 Constitution to "protect and advance the right of the people to a balanced and healthful ecology." The proposed Verde Island Passage Protected Seascape (VIPPS) designation will not only conserve and rehabilitate marine ecosystems but also provide the much needed administrative framework for its sustainable development and inclusive environmental governance.

This will mandate the creation of a multi-sectoral Protected Area Management Board (PAMB) to guide policies, ensure enforcement, and promote equitable benefit-sharing. It further incorporates capacity building, participatory planning, and a zoning strategy that balances strict protection zones with multiple-use areas to allow for sustainable livelihoods. The inclusion of a Special Use Agreement in Protected Areas (SAPA) framework ensures that development is regulated, science-based, and climate-resilient.

In a time when the world grapples with a triple crisis of climate change, biodiversity loss, and pollution, the Philippines has an urgent responsibility to safeguard its most irreplaceable ecosystems. By legislating the protection of the Verde Island Passage, the Philippines asserts global leadership in marine conservation and affirms its commitment to the 2030 Sustainable Development Goals, the Convention on Biological Diversity, and the Paris Climate Agreement.

In view of the foregoing, the approval of this bill is earnestly sought.
