

Republic of the Philippines  
**House of Representatives**  
Quezon City, Metro Manila

**TWENTIETH CONGRESS**  
*First Regular Session*

**HOUSE BILL NO. 376**

---

Introduced by **Representative Francisco T. Matugas**

---

### **EXPLANATORY NOTE**

A national land use law or policy is long-overdue. For decades, the Philippines has lacked a unified, national framework to guide land use and management. While several laws address specific land-related issues, there remains no overarching policy that integrates and harmonizes these into a coherent land use strategy.

This bill seeks to establish a comprehensive and sustainable framework for managing the country's land and natural resources. Its passage is crucial in addressing the growing challenges of environmental degradation, urban congestion, food insecurity, and disaster vulnerability in the Philippines.

At present, land use planning in the country is fragmented and governed by overlapping policies and regulations administered by different government agencies. This results in conflicting land uses, inefficient allocation of land resources, and unregulated development. This bill seeks to establish a National Land Use Commission which will serve as the highest policy making body on land use and resolve land use policy conflicts between or among agencies, branches, or levels of the government. It shall also coordinate efforts towards the development of integrated land use plans at the national, regional, provincial, and municipal/city levels, and monitor the implementation of all land use plans including relevant policies.

Efforts to pass a national land use act date back to as early as the 9th Congress. Great stride was made, however, during the 19<sup>th</sup> Congress when a version of the bill was passed on Third Reading by the Lower Chamber. This version of the bill is the said Third Reading version.

This version is the result of the efforts of both the legislative and executive branches of government to come up with a version acceptable to all. It is the joint effort by all relevant stakeholders to finally see a national land use bill to fruition.

The importance of a National Land Use Policy cannot be overemphasized. It will provide a sustainable and equitable use of our land and ensure its proper allocation. It will serve as a guide to both national and local planners and address issues of food insecurity, climate change and disaster risks, among others.

Considering the importance of this piece of legislation, it's immediate passage is earnestly sought.

*Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:*

**CHAPTER I**

**INTRODUCTORY PROVISIONS**

SECTION 1. *Short Title.* – This Act shall be known as the “*National Land Use Act*”.

SEC. 2. *Declaration of Principles and Policies.* – All lands of the public domain, waters, minerals, coal, petroleum, and other mineral oils, all forces of potential energy, fisheries, forests or timber, wildlife, flora and fauna, and other natural resources are owned by the State. With the exception of agricultural lands, all other natural resources shall not be alienated.

Pursuant to the constitutional provision or mandate, it is the policy of the State to provide for a rational, holistic, and just allocation, utilization, management, and development of the country’s land to ensure their optimum use to promote sustainable socioeconomic development and ecological protection.

1           The State recognizes the need for rational, optimal and sustainable settlements  
2 development, consistent with the principles of environmental management and equitable  
3 access to land and security.

4           Toward this end, the State institutionalizes land use and physical planning as  
5 mechanisms for identifying, determining, and evaluating appropriate land use and allocation  
6 patterns that promote and ensure:

7           (a)     Sustainable management and utilization of natural resources;

8           (b)     Maintenance and preservation of environmental integrity and stability  
9 specifically the perpetual protection of permanent forests and watershed and ecosystem  
10 services for the attainment of food, water and energy sufficiency;

11          (c)     Disaster risk-reduction and climate change resiliency;

12          (d)     Protection of prime agricultural lands for food security in basic commodities  
13 with emphasis on self-sufficiency in rice and corn;

14          (e)     Water security through sustainable development and management of water  
15 resources towards water security;

16          (f)     Provision of adequate and efficient settlements, transportation and  
17 infrastructure development in support of urban, peri-urban, and rural linkages towards  
18 regional development and inclusive growth;

19          (g)     Harmony between the rights and the varied interests of every Filipino within  
20 the framework of people empowerment, decentralization, social justice, and equity;

21          (h)     Respect for and protection of the sustainable traditional resource rights of the  
22 Indigenous Cultural Communities/Indigenous Peoples (ICCs/IPs) to their ancestral domains  
23 to ensure their economic, social, and cultural well-being as well as recognition of the  
24 applicability of customary laws and sustainable traditional resource use and management,  
25 knowledge, and practices in ancestral domains in compliance with free and prior informed  
26 consent of ICC/IPs;

(i) Protection of the rights of basic sectors to equitable access to the country's land;

(j) Protection, preservation, and development of the country's historical, cultural, archaeological, and built heritage resources for the deeper understanding of our history and culture as a people;

(k) Attainment of energy security and self-sufficiency;

(l) A whole-of-society and whole-of-government orientation, through which thrusts and strategies espoused by different actors and sectors are heard and brought together to achieve complex and interrelated goals, is encouraged and adopted as a basic parameter in achieving efficiency in land use and allocation, within the framework of ecological development and equity;

(m) Promotion of the integrated approach to land use and urban transport planning to effectively manage growth in urban areas and ensure that the capacity of transport facilities can accommodate the demand for movement of passengers and goods to, from, and within the centers of socioeconomic activities;

(n) Vertical and horizontal linkages or spatial strategies and the potential for co-management and inter-locality cooperation across territorial jurisdictions and government levels, highlighting the imperative for a ridge-to-reef and ecosystem-based approach to land and water resource management and governance; and

(o) Data and evidence-informed management and governance of land and water resources, in line with the place-based aspirations and shared values of the community.

It is also the policy of the State to ensure that local government units (LGUs) share with the national government the responsibility of managing and maintaining ecological balance within their territorial jurisdiction as stated in the 1987 Constitution and Republic Act 7160, as amended, also known as the "*Local Government Code of 1991*." Guided by the principle that the use of land bears a social function and that all economic agents contribute to

1 the common good, landowners, land tenure holders, in the case of forestlands, be it an  
2 individual, communal, corporate or group, is held responsible for developing and conserving  
3 their lands, thereby making their lands productive and supportive of environmental stability.

4 SEC. 3. **Scope.** – This Act applies to all lands and natural resources in the country,  
5 whether public, private, government-owned or in the possession of any person, whether  
6 natural or juridical, and serves as guide for the rational, holistic and just allocation,  
7 utilization, development and management of the land and water resources in the country,  
8 including such activities that bear impact on those resources.

9 SEC. 4. **Definition of Terms.** – As used in this Act:

10 (a) *Agricultural land* refers to land of public domain which has been classified as  
11 such and is devoted to agricultural activity as defined under RA 6657, as amended, otherwise  
12 known as the “*Comprehensive Agrarian Reform Law of 1988*,” and not further classified for  
13 residential, commercial or industrial use and such other uses as may be provided by law;

14 (b) *Agricultural land use conversion* refers to the act or process of changing the  
15 current physical use of a piece of agricultural land into some other use not comprising an  
16 agricultural activity as defined under RA 6657, as approved exclusively by the Department of  
17 Agrarian Reform (DAR) in an order of conversion;

18 (c) *Alienable and Disposable (A&D) lands* refer to lands of the public domain  
19 which have been delineated, classified, and certified as open and available for disposition  
20 under existing laws;

21 (d) *Ancestral domains* refer to all areas generally belonging to indigenous cultural  
22 communities or indigenous peoples as defined in RA 8371, otherwise known as “*The*  
23 *Indigenous Peoples’ Rights Act of 1997*;”

24 (e) *Archaeological site* refers to any place, whether above or underground,  
25 underwater or at sea level, containing fossils, artifacts and other cultural, geological,

botanical, zoological materials which depict and document culturally relevant paleontological, prehistoric or historic events;

(f) *Basic sector* refers to a group of people not referring to any organized groups, such as but not limited to women, youth, elderly, differently abled, peasants and fisherfolk;

(g) *Coastal area or zone* refers to a band of dry land and the adjacent ocean space, water and submerged land, in which terrestrial processes and uses directly affect oceanic processes and uses and *vice versa*, the geographic extent of which includes areas within a landward limit of one (1) kilometer from the shoreline at high tide to include mangrove swamps, brackish water ponds, nipa swamps, estuarine rivers, sandy beaches and other areas within a seaward limit of two hundred (200) meters isobaths to include coral reefs, algal flats, seagrass beds, and other soft-bottom areas;

(h) *Comprehensive Land Use Plan (CLUP)* refers to a plan embodying a set of policies accompanied by maps and similar illustrations that serves as a policy guide for determining the future use of lands and natural resources within the territorial jurisdiction of the LGU, including municipal waters with due consideration to the biogeographic region within which the locality belongs, representing the community desired pattern of population distribution and proposes future allocation of land and resources to various activities including the processes and criteria employed in such determination of allocation of land and resources for a long-term management of the local territory covering a minimum period of twelve (12) years, reviewable not earlier than every six (6) years;

(i) *Comprehensive land use planning* refers to the act of defining the allocation, utilization, development and management of all lands and water resources within a given territory or jurisdiction according to the inherent characteristic and carrying capacities of the land itself and supportive of sustainable economic, demographic, socio-cultural and environmental objectives as an aid to decision-making and legislation;

1           (j)     *Critical habitats* refer to areas outside protected areas as defined in RA 7586,  
2 otherwise known as the “*National Integrated Protected Areas System Act of 1992*,” that are  
3 known habitats of threatened species and designated as such based on scientific data taking  
4 into consideration species endemicity or richness, presence of human-made pressures or  
5 threats to the survival of wildlife living in the area;

6           (k)     *Critical watershed* refers to a drainage area of a river system supporting  
7 existing and proposed hydroelectric power, irrigation works or existing water facilities  
8 needing immediate protection and rehabilitation to minimize erosion and improve water  
9 yield;

10          (l)     *Cultural heritage* refers to the totality of cultural properties, whether natural or  
11 human made, preserved and developed through time and passed on for posterity;

12          (m)     *Cultural property* refers to all products of human creativity by which a people  
13 and a nation reveal their identity, including churches, mosques and other places of religious  
14 worship, schools and natural history specimens and sites, whether public or privately-owned,  
15 movable or immovable, and tangible or intangible;

16          (n)     *Customary laws* refer to a body of written or unwritten rules, usages, customs  
17 and practices traditionally and continually recognized, accepted, and observed by respective  
18 ICCs/IPs, consistent with RA 8371;

19          (o)     *Development plan* refers to the activities and measures that the national  
20 government or LGUs intend to implement over a specified period of time to achieve the  
21 defined set of development goals identified in the national or local physical framework plans  
22 integrating socio-economic, financial, fiscal, legal and legislative institutional and sectoral  
23 plans of the national government or any of its instrumentalities or a particular LGU,  
24 consistent with the objectives identified in spatial plans, such as land use plans or physical  
25 framework plans including an analysis of problems and resources, definition of goals and  
26 objectives, policy guidelines, programs and projects, and an implementation mechanism

1 which defines the roles and contributions expected from the government and the private  
2 sector;

3 (p) *Ecologically fragile areas* refer to areas within critical watersheds, brackish  
4 and freshwater wetlands, pasture lands, inland rivers and waterways coastal and settlement  
5 areas, and croplands which require rehabilitation, protection and whose continued  
6 unsustainable use may result in physical risks and threats to life and property, public health  
7 and safety as well as adversely affect the productivity of lowland agricultural areas and  
8 stability of the upland system;

9 (q) *Ecotourism* refers to a form of sustainable tourism within a natural or cultural  
10 heritage area where community participation, protection and management of natural  
11 resources, culture and indigenous knowledge and practices, environmental education and  
12 ethics, as well as economic benefits are fostered and pursued for the enrichment of host  
13 community and satisfaction of visitors;

14 (r) *Energy resources* refer to surface or subsurface substances that serve as  
15 energy resources including traditionally mineral fuel deposits such as coal petroleum, natural  
16 gas or renewable resources from geothermal, hydro reservoirs or non-conventional sources  
17 such as ocean waves, solar, wind, biomass, and other similar resources which serve the same  
18 purpose;

19 (s) *Energy resource lands* refer to lands where naturally occurring or indigenous  
20 energy resources exist in sufficient quantity or quality as to be economically viable for  
21 exploration, development production, utilization and distribution purposes;

22 (t) *Exhausted mineral resources* refer to specific sites where the mineral  
23 resources are no longer in sufficient quantity or quality to justify additional expenditure for  
24 extraction or utilization as determined by the Mines and Geosciences Bureau and approved  
25 by the Department of Environment and Natural Resources (DENR);

(u) *Flood plain* refers to relatively smooth valley floors adjacent to and formed by rivers which overflow its banks at flood stages. The plain usually consist of unconsolidated fine sediments such as sand, silt, and clay;

(v) *Flood-prone areas* refer to low lying areas usually adjacent to large or active water bodies and which therefore experience regular or seasonal inundation as a result of changes in the mean water level of these bodies or because of land reclamation and other artificial interference with the natural processes;

(w) *Foreshore land* refers to a string of land margining a body of water, the part of a seashore between the low-water line usually at the seaward margin of a low tide terrace and the upper limit of wave wash at high tide marked by a beach scarp or berm;

(x) *Forest* refers to an ecosystem or an assemblage of ecosystems dominated by trees and other woody vegetation or a community of plants and animals interacting with one another and its physical environment;

(y) *Forest lands* refer to one of the four classifications of land defined in the Constitution under the public domain determined as suitable for forest purposes and not classified as mineral land, national park or agricultural land such as all permanent forest reserves, forest reservations, and all the remaining unclassified lands of the public domain;

(z) *Geo-hazards* refer to a geological process or phenomenon that may cause loss of life, injury or other health impacts, property damage, loss of livelihoods and services, social and economic disruption or environmental damage. This includes internal earth processes such as earthquakes and volcanic activities, and geophysical processes like mass movements landslides, surface collapses, debris and mud flow;

(aa) *Geo-hazard prone areas* refer to areas frequently affected and/or are vulnerable or at risk to weather/climatic, hydrologic, geologic and other natural calamities;

(bb) *Heritage zone* refer to historical, anthropological, archaeological, artistic geographical areas and settings that are culturally significant to the country, as declared by

1 the National Commission for Culture and the Arts (NCCA) and/or the National Historical  
2 Commission of the Philippines (NHCP);

3 (cc) *Illegal conversion* refers to an attempt to or an actual change in the use of land  
4 from agricultural to a residential, commercial, or industrial and other non-agricultural  
5 activity, without a conversion grant or clearance based on the requirements under Section 65  
6 of RA 6657, as amended, and to dispossess a tenant as provided under Section 73 (c) of RA  
7 6657, as amended, when established from the following instances:

8 (1) an agricultural land is developed for use in non-agricultural activities without a  
9 DAR Conversion Order;

10 (2) the agricultural land being converted is irrigated or irrigable;

11 (3) there is land activity such as, but not limited to, earth filling/dumping, earth  
12 moving/digging, and quarrying, and in each case, bona fide conduct of  
13 agricultural activities on a greater portion of the land developed has ceased; and

14 (4) other analogous activities.

15 (dd) *Indigenous Cultural Communities/Indigenous Peoples (ICCs/IPPs)* refer to  
16 groups of people or homogenous societies identified by self-ascription and ascription by  
17 others, who have continuously lived as organized community on communally bounded and  
18 defined territory, and who have, under claims of ownership since time immemorial, occupied,  
19 possessed, and utilized such territories, sharing common bonds of language, customs,  
20 traditions, and other distinctive cultural traits, or who have, through resistance to political,  
21 social, and cultural inroads of colonization, non-indigenous religions and cultures, became  
22 historically differentiated from the majority of Filipinos including peoples who are regarded  
23 as indigenous on account of their descent from the populations which inhabited the country at  
24 the time of conquest or colonization, or at the time of inroads of non-indigenous religions and  
25 cultures, or the establishment of present state boundaries, who retain some or all of their own

1 social, economic, cultural, and political institutions, but who may have been displaced from  
2 their traditional domains, or who may have resettled outside their ancestral domains;

3 (ee) *Key Biodiversity Areas (KBAs)* refer to the present most important sites for  
4 biodiversity conservation worldwide which are considered places of international importance  
5 for the conservation of biodiversity through protected areas and other governance  
6 mechanisms and which are identified nationally using simple standard criteria based on their  
7 importance in maintaining species populations;

8 (ff) *Land* refers to resources, both artificial and natural, found on the surface,  
9 below, and above the ground, including inland waters and the air therein;

10 (gg) *Land use* refers to the manner of allocation, utilization, management and  
11 development of land;

12 (hh) *Land use classification* refers to the act of delineating or allocating lands  
13 according to protection land use, production land use, settlements development and  
14 infrastructure development as provided for in this Act;

15 (ii) *Land use planning* refers to the rational and judicious approach of allocating  
16 available land resources to different land-using activities, such as but not limited to  
17 agricultural, residential, industrial, commercial, institutional, forest land uses, and for  
18 different functions consistent with the overall development vision/goal of a particular  
19 locality;

20 (jj) *Mandatory public hearings or consultations* refer to the mechanism of  
21 involving the concerned stakeholders and communities in land use planning, from the  
22 barangay to the national level, to ensure the social acceptability of the plans including giving  
23 notice of hearing or consultation to the concerned stakeholders through publication or posting  
24 in conspicuous places, conducting a reasonable number of hearings, and soliciting positions  
25 to arrive at a consensus through public presentations and validation of the planning results  
26 undertaken before the final adoption of the plans;

(kk) *Marine protected area* refers to a defined area of the sea established and set aside by law, administrative regulation or any other effective means to conserve and protect a part of the entire enclosed environment, through the establishment of management guidelines;

(ll) *Minerals* refer to naturally occurring inorganic substance beneath or at the surface of the earth, whether or not under water, and includes all metallic minerals; and non-metallic minerals such as precious stones, industrial rocks, and building stones;

(mm) *Mineral lands* refer to any area where mineral resources are found, including areas that are established as mineral reservations, areas with active mining operations; areas with projected mining tenurial rights; and areas declared by court decisions as mineral lands;

(nn) *Mineral reservations* refer to areas established and proclaimed as such by the President of the Philippines upon the recommendation of the Director of the Mines and Geosciences Bureau through the DENR Secretary including all submerged lands within the contiguous zone and Exclusive Economic Zone.

(oo) *National Integrated Protected Areas System (NIPAS)* refers to the classification and administration of all designated protected areas to maintain essential ecological processes and life-support systems, to preserve genetic diversity, to ensure sustainable use of resources found therein, and to maintain their natural conditions to the greatest extent possible;

(pp) *National park* refers to forest reservation, essentially of natural wilderness character, which has been withdrawn from settlement, occupancy or any form of exploitation, except in conformity with the approved management plan and set aside as such exclusively to conserve the area or preserve the scenery, natural and historic objects, wild animals and plants therein, and to provide enjoyment of these features in such areas including lands and waters of the public domain classified as such in the Constitution such as all areas under the NIPAS primarily designated for the conservation of native plants and animals and associated habitats and cultural diversity;

1            (qq)    *Network of Protected Areas for Agriculture and Agro-Industrial Development*

2    (NPAAAD) refers to agricultural areas identified by the Department of Agriculture (DA),  
3    through the Bureau of Soils and Water Management in coordination with the National  
4    Mapping and Resource Information Authority (NAMRIA), in order to ensure the efficient  
5    utilization of land for agriculture and agro-industrial development and to promote sustainable  
6    growth, covering all irrigated areas, all irrigable lands already covered by irrigation projects,  
7    all alluvial plains, lands highly suitable for agriculture, whether irrigated or not, agro-  
8    industrial croplands or lands planted with industrial crops that support the validity of existing  
9    agricultural infrastructure and agro-based enterprises, highlands or areas located at an  
10   elevation of five hundred (500) meters or above and have the potential for growing semi-  
11   temperate and high value crops, all agricultural lands that are ecologically fragile, the  
12   conversion of which may result in serious environmental degradation, and all mangrove areas  
13   and fish sanctuaries;

14           (rr)    *Physical framework plans* refer to the national, regional or provincial  
15   indicative plans that outline the over-all and macro-level spatial and physical development  
16   objectives, priorities, directions and strategies in its respective levels as prepared, reviewed,  
17   integrated and finalized by the national, regional and provincial land use councils or boards  
18   respectively, based on the CLUPs of the LGUs and the national policy guidelines relating to  
19   land use, infrastructure development and environmental management to prevent or mitigate  
20   the adverse effects of inappropriate resource utilization on food security, the welfare of the  
21   people and their environment;

22           (ss)    *Physical Planning* is the process of organizing physical activities and land  
23   uses, including settlements, environmental protection, economic activities, and infrastructure  
24   to ensure sustainable, orderly, and optimal siting and coordination of land uses;

25           (tt)    *Prime agricultural lands* refer to all contiguous irrigated lands/areas and  
26   irrigable lands already covered by irrigation projects, including all alluvial plain lands highly

1 suitable for agriculture, not irrigated that have been identified to satisfy the need for food  
2 self-sufficiency and food security and agro-industrial croplands or lands presently planted to  
3 industrial and high value crops that support the viability of existing agricultural infrastructure  
4 and agro-based enterprises, highlands or areas located at an elevation of five hundred (500)  
5 meters or above, highly suitable for growing semi-temperate and high value crops outside of  
6 declared permanent forestlands and protection forests, and are not located in ecologically  
7 fragile and environmentally critical areas;

8 (uu) *Production land use* refers to the most efficient, sustainable, and equitable  
9 utilization, development and management of land for productive purposes which are not  
10 classified for protection land use;

11 (vv) *Protected areas* refer to portions of land and water set aside by reason of their  
12 unique physical and biological diversity and protected against human exploitation including  
13 all natural forests and agricultural lands identified and delineated under this Act;

14 (ww) *Reclassification of agricultural lands* refer to the act of specifying how  
15 agricultural lands are classified or used for non-agricultural uses such as residential, industrial  
16 or commercial purposes, as embodied in the land use plan subject to the requirements and  
17 procedure for reclassification undertaken by the LGU in accordance with Section 20 of RA  
18 7160, as amended;

19 (xx) *Resettlement areas* refer to areas identified by the appropriate national agency  
20 or by the LGU with respect to areas within its jurisdiction which are used for the relocation of  
21 the underprivileged and homeless, as defined under RA 7279, otherwise known as the  
22 “*Urban Development and Housing Act of 1992*;

23 (yy) *Strategic Agriculture and Fisheries Development Zones (SAFDZ)* refers to the  
24 areas within the NPAAAD identified for production, agro-processing, and marketing  
25 activities to help develop and modernize, with the support of government, the agriculture and

fisheries sectors in an environmentally and socio-culturally sound manner pursuant to Section 4 of RA 8435 or “*Agriculture and Fisheries Modernization Act of 1997*;”

(zz) *Settlements* refer to communities or built-up environment areas where people prefer to live in;

(aaa) *Settlements development* refers to any improvement on existing settlements or any proposed development of certain areas for settlement purposes involving the spatial distribution of population, identification of the roles and functions of key urban centers, determination of relationships among settlement areas, and the provision of basic services and facilities of identified major settlement areas of growth centers;

(bbb) *Shoreline* refers to a strip of land covering of at least one (1) kilometer from the point where seawater reaches during the highest high tide;

(ccc) *State universities and colleges (SUCs)* refer to public higher education institutions in the Philippines created and established by law which constitutes their charter and which have independent and separate governing boards;

(ddd) *SUC Land Use Plan* refers to a campus master plan mandated under RA 11396, otherwise known as the “*SUCs Land Use Development and Infrastructure Plan Act*” that contains the allocation and utilization of the land within a campus’ geographic boundary to meet the required academic and non-academic support services and facilities as well as the campus development programs and projects and the investment needed to implement them;

(eee) *Sustainable development* refers to the development objective of meeting the needs of the present generation without compromising the ability of future generations to meet their own needs consistent with the principles of social equity, efficiency and environmental integrity;

(fff) *Tourism development areas* refer to specific sites for tourism development located in areas identified as priorities in the national and regional tourism master plans and those designated through legislative and executive issuances as tourist spots and tourist zones

1 which may be developed into tourism estates or integrated resort, leisure, recreation  
2 complexes, and other tourism related facilities;

3 (ggg) *Tourism ecozone* refers to tourism development areas, outside of protection  
4 lands which have been granted special economic zone status through the Philippine Export  
5 Zone Authority registration and issuance of the required Presidential Proclamation, with its  
6 metes and bounds, delineated by said proclamation, pursuant to RA 7916, as amended,  
7 otherwise known as “*The Special Economic Zone Act of 1995*;

8 (hhh) *Tourism estates* refer to large tracts of land with well-defined boundaries in  
9 any area, excluding those protection lands, identified in the Philippine tourism master plan  
10 and regional tourism by proclamation of the President of the Philippines or by acts of  
11 Congress or by local legislation and declared suited for the development of an integrated  
12 tourism and resort complex with prescribed carrying capacities and limits for its facilities and  
13 activities;

14 (iii) *Tourist spot* refers to a particular area, site or spot, man-made or natural,  
15 known for its unique tourist or visitor-drawing attributes and activities and which may be  
16 classified according to its social, cultural, natural, historical, aesthetic, visual, scientific,  
17 religious, or recreational significance;

18 (jjj) *Tourist zone* refers to a geographic area with well-defined boundaries  
19 proclaimed as such by the President of the Philippines or by acts of Congress where  
20 development projects for any purpose are initiated and introduced prior to formulation of a  
21 tourism master development plan which are undertaken in coordination with the Department  
22 of Tourism (DOT) and the Tourism Infrastructure Enterprise Zone (TIEZA) for the  
23 enhancement or the conservation of cultural and historical heritage, and for the appreciation  
24 and enjoyment of the local population and its visitors;

(kkk) *Transmission line corridor* refers to the land beneath, the air spaces surrounding, and the area traversed by electric power transmission lines including its horizontal, vertical, and similar clearance requirements;

(lll) *Urban areas* refer to all cities regardless of their population density and to municipalities with a population density of at least five hundred (500) persons per square kilometer;

(mmm) *Urbanizable areas* refer to sites and lands which, considering present characteristics and prevailing conditions, display great potential of becoming urban areas within a period of five (5) years;

(nnn) *Urban forest or green space* refers to the establishment or setting up of areas for mini-forest, eco-parks or small nature parks, in both public and private lands, wetlands, man-made lagoons and lakes systems, riverbanks and shores, grasslands, roof and rock gardens, lining roads and highways with trees, shrubs, or ornamental plants, and ground landscaping of schools, hospitals, and other government agencies in order to improve the environment in urban areas;

(ooo) *Water security* refers to the sufficient access throughout the year to the minimum daily requirement of clean water to maintain a healthy life;

(ppp) *Water use* refers to the appropriation of water for domestic, municipal, irrigation, power generation, inland fisheries, poultry and livestock, industrial and commercial, environmental, and recreational use;

(qqq) *Watershed* refers to a topographically delineated area of land from which rainwater can drain as surface run-off *vis-a-vis* a specific stream or river system to a common outlet point which may be a dam, irrigation system or urban water supply take off point, or where the stream discharges into a river, lake, or the sea;

(rrr) *Zoning* refers to the regulatory tool for delineating the specific land uses in accordance with the approved CLUP within the territorial jurisdiction of a city or

municipality and specifying the conditions for their regulation, subject to the limitations imposed by law and competent authority; and

(sss) *Zoning ordinance* refers to a local law passed by the *Sangguniang Bayan* or *Panlungsod* approving the development control or zoning plan in accordance with an approved or adopted CLUP of the city or municipality, providing for the regulations and other conditions on the land uses, including the limitation on the infrastructure that may be placed within the territorial jurisdiction of the city or municipality, incorporating the protected areas, protected agricultural lands and ancestral lands as provided for in this Act.

## CHAPTER II

### PHYSICAL FRAMEWORK AND LAND USE PLAN

SEC. 5. *National Physical Framework Plan.* – The National Land Use Commission (NLUC) created under Section 18 herein shall draft the National Physical Framework Plan (NPFP), which shall have a timeframe of thirty (30) years, with regular review and updating every ten (10) years. The NPFP, which guides the planning and management of the country's land and other physical resources at the national and sub-national levels, shall indicate broad spatial directions and policy guidelines on settlements development, production land use, protection land use, social services and utilities, transmission line corridor, and transportation and communication.

The Regional Physical Framework Plans (RPFs), Provincial Physical Framework and Development Plans (PPFDPs), and CLUPs shall cover the physical development of their respective territories and shall be consistent with the NPFP: *Provided, That* the integration and harmonization of the physical framework plans at all levels shall be iterative to ensure that the concerns of both top and bottom levels of government are considered. The physical and land use plans prepared at all levels shall have internal consistency specifically on, but not limited to, the development, management and conservation of forestlands, watersheds, and all terrestrial, aquatic, and marine ecosystems found within a given territory and the

1 linkages of the major land use categories to ensure their complementation in the utilization,  
2 development, management, protection and conservation of all natural resources. The NLUC  
3 shall issue procedural guidelines which shall guide the formulation and integration or  
4 harmonization of land use plans at all levels: *Provided*, That the National Economic  
5 Development Authority (NEDA), DENR, Department of Human Settlements and Urban  
6 Development (DHSUD), Department of the Interior and Local Government (DILG) and other  
7 agencies will continue to issue specific guidelines on the planning process and content of the  
8 plans consistent with the NLUC guidelines and their respective agency mandates.

9       **SEC. 6. *Regional Physical Framework Plans.*** – In consultation with concerned  
10 sectors, the Regional Land Use Policy Council (RLUPC) shall define the desired spatial  
11 arrangement of land and land-use activities in the entire region, based on the consolidated and  
12 harmonized PPFDPs of provinces and independent cities within the territorial jurisdiction of  
13 the region. The RFPF, which depicts an end-state scenario toward which efforts and activities  
14 are directed, shall consist of spatially-based and area-focused policies, consistent with those  
15 in the national framework for physical planning, to guide detailed physical, socio-economic,  
16 sectoral and investment planning. The RFPF shall have a planning period of twelve (12)  
17 years to be updated every six (6) years or when deemed necessary.

18       **SEC. 7. *Provincial Physical Framework and Development Plans.*** – In consultation  
19 with concerned sectors, the Provincial Planning and Development Office (PPDO) shall  
20 prepare a Provincial Physical Framework and Development Plans (PPFDP), which shall  
21 define the province's development vision, economic and social development policies,  
22 environmental and ecological protection policies, general land uses, and inter-city/municipal  
23 transportation system. The PPFDP shall integrate and harmonize the land use plans of  
24 component cities and municipalities using the ridge-to-reef (R2R) or watershed ecosystem  
25 management (WEM) approach taking into consideration shared watersheds, ecosystems and  
26 natural resources and planning concerns, and define the uses of land and other resources

1 within the province consistent with the policies in the regional physical framework plan. The  
2 programs, projects and activities prescribed in the PPFDPP shall be integrated into the  
3 provincial development investment program. The PPDO shall submit the PPFDPP to the  
4 Provincial Land Use Policy Council (PLUPC), created under Section 24 of this Act, for  
5 review and endorsement to the *Sangguniang Panlalawigan*, which shall adopt the same  
6 pursuant to Section 468 (2) (vii) of RA 7160. The PPFDPP shall have a planning period of  
7 twelve (12) years to be updated every six (6) years or when deemed necessary.

8       **SEC. 8. *City/Municipal Land Use Plans.*** – The City/Municipal Planning and  
9 Development Office (C/MPDO) shall prepare the comprehensive land use plan (CLUP) to  
10 determine the specific uses of land and other physical resources therein including areas co-  
11 managed with the national government and, as appropriate, the ancestral domain areas. This  
12 shall be done in consultation with concerned sectors through mandatory conduct of public  
13 hearings and with the use of technology-based systems such as, but not limited to, the  
14 Community-Based Monitoring System (CBMS) required to be established in every city and  
15 municipality under RA 11315 or the “*Community-Based Monitoring System Act.*” The CLUP  
16 shall be consistent with the R2R/WEM-based PPFDPP and shall define the city or municipal  
17 development vision, appropriate economic, environmental and social development policies,  
18 densities and transportation system using the R2R/WEM approach. The CLUP shall have a  
19 planning period of twelve (12) years to be updated every six (6) years or when deemed  
20 necessary. The C/MPDO shall also use, among others, the CBMS in the updating of the  
21 CLUPs.

22       The R2R/WEM-based CLUP will be used as the common reference framework for  
23 the preparation of all sectoral development plans that will form part of the Comprehensive  
24 Land Use and Development Plan which merges the traditionally separate CLUP and  
25 comprehensive development plan to address the disconnect between spatial development and  
26 sectoral programs and to ensure the complementation between the medium- and long-term

1 concerns and shall be the basis of the formulation of the local development investment  
2 program. The CLUP shall be translated into a zoning ordinance by the concerned *Sanggunian*  
3 to regulate the uses of land, including the limitations on height, density and bulk of buildings  
4 and other infrastructure that may be placed thereon.

5       **SEC. 9. *Physical Framework and Land Use Planning Process.*** – The land use and  
6 physical planning process shall be formulated following a combined bottom-up and top-down  
7 approach. The NLUC, in consultation with the concerned sectors through the mandatory  
8 conduct of public hearings, shall formulate, periodically update and ensure the  
9 implementation of the NPFP that shall prescribe and influence the country's land use and  
10 physical development. The NPFP shall operationalize the policies provided in this Act and  
11 shall be the basis for adopting land use and physical planning-related guidelines and  
12 standards, including zoning and other land use control standards that shall guide the  
13 formulation of city/municipal zoning ordinances. The policies prescribed in the NPFP shall  
14 be integrated into the Medium-Term Philippine Development Plan and Medium-Term  
15 Philippine Investment Program.

16       In the formulation of the respective National, Regional Provincial or City/Municipal  
17 Land Use Plans, the respective SUC Land Use Plans approved by the CHED prior to the  
18 approval of this Act shall be taken into consideration in the approval of the plans. As such,  
19 the President of the SUCs shall be consulted prior to the approval of the said plans.

20       **SEC. 10. *Land Use Plans for Ancestral Domains.*** – Land use plans for ancestral  
21 domains shall be formulated by the ICCs/IPs themselves in accordance with their needs and  
22 traditional resource and management systems with the assistance of the NCIP, the LGUs and  
23 civil society organizations (CSOs) concerned. Such plans shall be recognized and adopted in  
24 the City/Municipal, Provincial, Regional and National Physical Framework Plans.

25       Physical Framework Plans made prior to the delineation of ancestral domains  
26 included in such plans shall, without prejudice to the rights of the ICCs/IPs concerned, adopt

different land use categories in accordance with their particular needs and traditional resources and management systems.

In cases where there are no ancestral domains sustainable development and protection plans (ADSDPPs), the LGUs and ICCs/IPs shall jointly formulate the land use within the ancestral domains until such time that the ICCS/IPS shall have formulated their ADSDPPs.

SEC. 11. *Revision of Existing Planning Guidelines.* – The existing planning guidelines on the NPFP, RPFP and PPFDPP shall be reviewed and revised pursuant to Sections 5, 6, 7, and 9 of this Act.

### CHAPTER III

#### FRAMEWORK FOR LAND USE PLANNING

SEC. 12. *Basic Objective of Land Use or Physical Framework Planning.* – The primary objective of a physical framework plan is to describe existing land uses and to identify an integrated physical framework, including an overall vision, policies on social and economic development and environmental protection and supporting transportation and other infrastructure facilities, that shall define future development. Its output includes the identification of programs, projects and activities needed to achieve the desired development, without compromising environmental and ecological stability, and which shall serve as inputs to the investment program. In the case of the CLUP, it is also intended to provide specific development and building guidelines and parameters that will be implemented through a zoning ordinance.

SEC. 13. *Priorities in Land Use Allocation and Planning.* – Using the R2R/WEM approach in projecting spatial allocation for different land uses, the LGUs shall first exclude areas under protection land use in Section 17(a) hereof, national parks, energy resource lands, and prime agricultural lands to ensure ecological integrity, energy supply, and promote food security. Areas with prior rights and those with site-specific resources for basic services, such as but not limited to, water and indigenous energy resources, shall also be excluded. All land

1 use activities inside the excluded areas that are not consistent with the general purposes of the  
2 excluded areas shall be assessed, regulated, and/or modified to ensure that these activities do  
3 not compromise the general purposes of the excluded areas. Spatial allocation and planning  
4 shall then proceed in accordance with Sections 16 and 17 hereof with priorities given to  
5 integrated watershed management areas, socialized housing sites, fisherfolk settlement in  
6 coastal areas, and waste disposal sites.

7       SEC. 14. *Approach to Land Use and Physical Framework Planning.* – The  
8 R2R/WEM approach shall be used in land use and physical framework planning to promote a  
9 holistic, integrated, equitable and inclusive development, and a flourishing environment,  
10 watersheds and ecosystems. It shall include a description of existing land uses and land use  
11 trends, as well as the physical, demographic, economic, social, political, environmental, and  
12 ecological conditions that have shaped and are likely to shape future land use and physical  
13 developments. It shall then derive a land use plan or physical framework by matching,  
14 reconciling or integrating the demand for land with the supply of land in a holistic manner to  
15 optimize socioeconomic development and minimize the total impacts of the land use plan on  
16 watersheds and ecosystems. The resulting land use plan or physical framework shall be the  
17 basis for identifying necessary policies, programs, projects and activities, and development  
18 controls to guide future development. The land use plan or physical framework shall be  
19 holistic in nature and not emanate from a specific individual or corporation which, in essence,  
20 constitutes as spot zoning.

21       SEC. 15. *Adoption of Multiple Uses of Land Resources.* – The primary and  
22 alternative uses of a specific unit of land resource based on its capability to support certain  
23 uses sustainably shall be determined and evaluated prior to any decision for the assignment of  
24 its use. Areas feasible for sustainable land resource use may be considered multiple-use zones  
25 wherein settlements, tourism, agriculture, forestry, agro-forestry and extraction activities and  
26 other income-generating or livelihood activities may be allowed by concerned agencies:

1 *Provided*, That multiple uses of land resources shall be excluded in areas identified as  
2 protection land use: *Provided, further*, That such land uses shall maximize the socioeconomic  
3 benefits without compromising the desired levels of ecosystem services within a ridge to reef  
4 unit: *Provided, finally*, That such land uses shall be in accordance with priorities in land use  
5 allocation and planning and that no reclassification shall be allowed.

6 SEC. 16. ***Basic Land Use Planning Considerations.*** – In determining the various  
7 land uses, the people and their productive activities and the need for functional open spaces  
8 and preservation areas as well as the various interrelationships of the physical characteristics  
9 of the land and other elements therein shall be considered, among others, including the  
10 following:

11 (a) Availability of natural resources including indigenous energy resources for  
12 energy security and self-sufficiency;

13 (b) Geology, geomorphology, current and emerging geologic climate-related  
14 hazards and risks, soil, vegetative cover, demography and slope;

15 (c) Economic, environmental, cultural, social and related development activities;

16 (d) Existing government policies on land and natural resources allocation,  
17 utilization, management and disposition;

18 (e) Technological changes or advancement;

19 (f) Existing customary rights for the protection of indigenous peoples and  
20 vulnerable groups including women, rural and urban poor;

21 (g) Desired levels of ecosystem services like water quality and quantity, soil  
22 stability, biodiversity, agricultural and fishery productivity, among others; and

23 (h) Inventory of prior and existing rights, to harmonize determination of land use.

24 SEC. 17. ***Categories of Land Uses for Planning Purposes.*** – In determining and  
25 defining the national, regional and provincial framework plans, and CLUPs, land uses shall  
26 be grouped into four major functional uses as follows:

1           (a)     *Protection land use* which include the use of land primarily for food, water  
2     and energy security, rehabilitation, conservation, and protection purposes to promote the  
3     country's ecological and life-support systems. Planning for protection land use intends to  
4     achieve food self-sufficiency in rice and corn, water and energy security, environmental  
5     stability and ecological integrity, ensure a balance between resource use and the preservation  
6     of some areas with environmental, aesthetic, educational, cultural, heritage and historical  
7     significance, and protect people and human- made structures from the ill-effects of natural  
8     hazards. All lands, either public or private, under protection land use shall be permanently  
9     conserved, preserved, rehabilitated and protected from all other land uses, disposition,  
10    intrusion, utilization and development that is not consistent with its existing uses. Areas  
11    under this category also include those covered by RA 7586, as amended by RA 11038 or the  
12    *"Extended National Integrated Protected Areas Act of 2018"*, and other coastal and marine  
13    protected areas, those areas outside NIPAS but nonetheless require protection because of  
14    their outstanding physical and aesthetic features, anthropological significance, and biological  
15    diversity, and those areas prone to natural hazards, such as but not limited to the following:

16               (1)     Natural forests and mossy areas with more than 50% in slope gradient;  
17               (2)     Mangrove and fish sanctuaries, pursuant to RA 8435, and RA 8550, or  
18               *"The Philippine Fisheries Code of 1998;"*

19               (3)     Buffer zones or strips/easements, pursuant to Presidential Decree (PD)  
20     389, otherwise known as the *"Forestry Reform Code of the Philippines"*, as amended  
21     by PD 705, or the *"Revised Forestry Reform Code of the Philippines"* and PD 1067,  
22     or the *"Water Code of the Philippines"*;

23               (4)     Salvage zones along foreshore areas, freshwater swamps and marshes,  
24     plazas, archaeological, and heritage or historic sites, pursuant to Presidential  
25     Proclamation No. (PP) 2146, series of 1981 entitled "Proclaiming Certain Areas and

Types of Projects Environmentally Critical and within the Scope of Environmental Impact Statement System Established under Presidential Decree No. 1586”;

(5) Watersheds supporting bulk or domestic water supply;

(6) Utility easement like power lines of electric power generators, transmission and distributors, oil and gas facilities, cell sites, and bulk/domestic water lines;

(7) Amenity areas or those with high aesthetic values, pursuant to PP 2146;

(8) Natural and human-made areas/sites of cultural, historical and anthropological significance, which are declared as such by internationally recognized organizations and concerned national agencies;

(9) Critical habitats as provided in RA 9147, otherwise known as the “*Wildlife Resources Conservation and Protection Act*”;

(10) Significant caves under RA 9072, otherwise known as the “*National Caves and Cave Resources Management and Protection Act*”; or

(11) Key biodiversity areas under Executive Order No. 578, series of 2006, entitled “*Establishing the National Policy on Biodiversity, Prescribing its Implementation Throughout the Country, Particularly in the Sulu Sulawesi Marine Ecosystem and the Verde Island Passage Marine Corridor*”.

Existing property and private rights shall be recognized and respected on the condition that these rights are harmonized with the intent of the identified protected land use.

(b) *Production Land Use* wherein there is a direct and indirect utilization of land resources for crop, fishery, livestock and poultry production, forestry, agroforestry, mining, industry, energy development, indigenous energy exploration and development, and tourism. Planning for production land determines the most efficient, sustainable, and equitable manner of utilizing, developing and managing land for productive purposes. Areas included in this

category are agricultural lands, fishing grounds, coastal and marine zones, production forest, which can be made available for timber and agroforestry production, rangelands for grazing, forest lands for special uses including for energy and reforestation projects, mineral lands or mining areas and reservations, energy resource lands, industrial development areas, and tourism development areas where productive activities may be undertaken to meet the country's requirements for food security, economic growth and development.

(c) *Settlements development* wherein any improvement on existing settlements in urban and rural areas or any proposed development of certain areas for settlement purposes involves the spatial distribution of population, identification of the roles and functions of key urban centers, determination of relationships among settlement areas, and the provision of basic services and facilities to such settlement. The settlements development plan ensures for the present and future generation the following: (1) effective integration of activities within and among settlements, allowing efficient movement of people and production of commodities through the provision of appropriate land, infrastructure, and facilities; (2) access of the population to housing, education, health care, recreation, transportation and communication, sanitation, and basic utilities such as water, power, waste disposal, and other services; and (3) security against risks associated with climate change and other natural hazards.

(d) *Infrastructure development* includes the availability or supply of basic services and fostering of economic and other forms of integration necessary for producing or obtaining the material requirements of Filipinos, in an efficient, responsive, safe and ecologically friendly built environment. It covers sub-sectors of transportation, communications, energy, water resources, and social infrastructure: *Provided, That* the determination of functional uses of lands within ancestral domains shall consider traditional resource and management systems that do not endanger the lives of the people and property

of the local community and neighboring areas or increase the vulnerability of the natural environment to the effects of natural and human-induced geological processes.

## CHAPTER IV

### IMPLEMENTING STRUCTURE AND MECHANISM

SEC. 18. *Creation of the National Land Use Commission.* – The National Land Use Commission (NLUC) is hereby created as a Commission under the Office of the President. It shall exercise the powers and responsibilities of the current National Land Use Committee, which is hereby abolished. The NLUC shall be chaired by a Commissioner to be appointed by the President. The Commissioner will have the rank of a Cabinet Secretary. The Commissioner shall be a qualified professional in any of the fields of land use, physical planning, environmental management, engineering, public governance or law.

The NLUC shall act as the highest policy making body on land use and resolve land use policy conflicts between or among agencies, branches, or levels of the government. It shall coordinate efforts towards the development of integrated land use plans at the national, regional, provincial, and municipal/city levels, and monitor the implementation of all land use plans including relevant policies.

SEC. 19. *Composition of the NLUC.* – The NLUC will be composed of the following:

(a) Commissioner of NLUC as Chairperson;

(b) Secretary of NEDA as Vice-Chairperson;

*As Ex-Officio Members:*

(c) Secretary of DENR;

(d) Secretary of DHSUD;

(e) Secretary of DA;

(f) Secretary of DAR;

(g) Secretary of Department of Public Works and Highways (DPWH);

1 (h) Secretary of DILG;

2 (i) A Representative from the LGUs;

3 (j) Chairperson of National Commission on Indigenous Peoples (NCIP); and

4 (k) Commissioner of the Bureau of Internal Revenue.

5 The Department Secretaries may designate a representative with a rank not lower than  
6 Assistant Secretary: *Provided*, That the designated representative shall be on a permanent  
7 basis. The representative from the LGUs shall come from the Leagues of Provinces, Cities  
8 and Municipalities.

9 SEC. 20. ***Powers and Functions.*** – The NLUC shall have the following powers and  
10 functions:

11 (a) Advise the President of the Philippines on all matters concerning land use and  
12 physical planning;

13 (b) Integrate and harmonize all laws, guidelines and policies relevant to land use  
14 and physical planning to come up with a rational, cohesive, and comprehensive national land  
15 use framework;

16 (c) Formulate policies and endorse land use and physical planning-related policies  
17 that may be formulated by the RLUPC, created under Section 23 of this Act, and concerned  
18 agencies as well as promulgate zoning and other land use control standards and guidelines  
19 which shall guide the formulation of land use plans and zoning ordinances by local  
20 governments;

21 (d) Prepare, periodically review and if necessary, update the national framework  
22 for physical planning to provide the general framework for the spatial development directions  
23 for the entire country and sub-national levels;

24 (e) Review and endorse all land use and physical planning related guidelines;

1           (f)     Monitor and coordinate the gathering of data, the conduct of studies pertaining  
2 to land use planning including studies on the management of identified land uses and such  
3 other studies not undertaken by other government agencies;

4           (g)     Recommend to the President of the Philippines the adoption, passage, or  
5 amendment of laws to ensure that sectoral programs, plans, projects, and activities, including  
6 local government initiatives affecting land use are consistent with national development  
7 objectives;

8           (h)     Coordinate with and assist other government agencies and LGUs in planning,  
9 developing, and implementing their land use classification programs, and provide, to the  
10 extent possible, technical assistance and guidance;

11          (i)     Monitor and coordinate the activities of concerned agencies and entities of the  
12 government, as well as LGUs, in the enforcement and implementation of land use plans,  
13 policies and regulations relating to land use and resource management and development;

14          (j)     Monitor and coordinate activities in the establishment of a national land  
15 resource information and management system of concerned agencies that shall integrate and  
16 process information on land use and allocation generated by the various national government  
17 agencies; define information requirements at various levels; and standardize information  
18 inputs and outputs including scales and symbols used in territorial and sectoral maps;

19          (k)     Be the repository of all RPFs, PPFDs and CLUPs and all data and  
20 information pertaining to land and land use;

21          (l)     Call on any department, bureau, office, agency, or instrumentality of the  
22 government, and or private entities and organization for cooperation, support, and assistance  
23 in the performance of its functions;

24          (m)     Decide and resolve policy conflicts and territorial jurisdiction on land use  
25 between or among agencies, branches, or levels of the government and act on unresolved land  
26 use policy conflicts at the regional level elevated by the RLUPC;

(n) Adopt rules of procedures for the orderly and expeditious conduct of meetings and other business of the Council; and

(o) Perform such other acts and functions and exercise such other powers as may be necessarily implied, inherent, incident, or related to the foregoing.

**SEC. 21. *National Land Use Office (NLUO).*** – The National Land Use Office (NLUO) is hereby created under the Office of the President, which will serve as technical secretariat to the NLUC. The NLUO shall be headed by the NLUC Commissioner with two (2) Deputy Commissioners with the rank of Undersecretary.

The DHSUD – Environmental, Land Use and Urban Planning and Development Bureau (DHSUD-ELUPDB) shall be converted into a line bureau that shall serve as the NLUO.

Further, the DHSUD-ELUPDB shall have service units for the planning and policy formulation, operations, monitoring and information systems management, technical assistance, legal, and special land use concerns. The staffing pattern of the NLUO shall be approved by the Department of Budget and Management.

**SEC. 22. *Regional Land Use Office.*** – A Regional Land Use Office (RLUO) is hereby created in each Region.

## **CHAPTER V**

### **REGIONAL AND LOCAL LAND USE POLICY BODIES**

**SEC. 23. *Regional Land Use Policy Council (RLUPC).*** – At the regional level, the RLUPC shall be institutionalized, replicating the NLUC structure and composition with DHSUD representative as Chairperson, NEDA representative as Vice-Chairperson and with a duly authorized representative from the DENR, DA, DAR, DPWH, DILG, NCCA, and LGU as members. The RLUPC shall have the following functions:

(a) Formulate and adopt regional policies on land use and physical planning;

(b) Prepare and periodically update an RPFP taking into consideration national policies and lower-level plans;

(c) Assist the provinces in preparing and periodically updating its physical framework plans to ensure consistency with the regional and national plans and policies and to facilitate its integration with the regional plans;

(d) Review, prior to adoption by respective *Sanggunians*, the PPFD, and CLUPs of highly urbanized and independent component cities, to ensure consistency with the RPFP and national policies set forth by the NLUC and compliance with limits prescribed under RA 7160, as amended, for reclassifying agricultural lands;

(e) Decide and resolve policy conflicts on land use planning, classification, and allocation that may arise between or among regional line agencies, provinces and cities or municipalities;

(f) Monitor changes in land use and other physical resources in the region;

(g) Evaluate consistency of major programs and projects with the regional physical framework plans and their impact on land use and the environment;

(h) Undertake the gathering of regional data for the land resource information and management system; and

(i) Perform other related functions as may be directed by the NLUC.

**SEC. 24. *Provincial Land Use Policy Council.*** – The Provincial Development Council, created under Section 106 of RA 7160, shall act as the PLUPC that will tackle land use concerns whenever necessary. A duly authorized representative from the DENR, DHSUD, DAR, DA, DILG, and DPWH shall be included in the composition of the PLUPC. In addition to the functions enumerated in Section 109 of RA 7160, the PLUPC shall:

(a) Advise the *Sangguniang Panlalawigan* on all matters pertaining to land use and physical planning;

1 (b) Review and endorse to the *Sangguniang Panlalawigan* for adoption, the  
2 provincial physical framework plans, prepared and periodically updated by the PPDO and  
3 other land use and physical planning-related policies;

4 (c) Decide and resolve policy conflicts on land use planning, classification, and  
5 allocation that may arise between or among cities or municipalities and any unresolved land  
6 use conflicts at the city or municipal level. The PLUPC may call upon any local official  
7 concerned such as provincial planning and development coordinator, provincial agriculturist,  
8 provincial environment and natural resources officer, provincial engineer, provincial assessor,  
9 or any official of national agencies and other relevant agencies during discussions on land use  
10 and physical planning concerns; and

11 (d) Assist the *Sangguniang Panlalawigan* in reviewing the CLUPs of component  
12 cities or municipalities to ensure consistency with the provincial physical framework plans  
13 and compliance with the limits prescribed under RA 7160, as amended, for reclassifying  
14 agricultural lands.

15 SEC. 25. ***City/Municipal Land Use Policy Council*** – The City/Municipal  
16 Development Council (C/MDC), created under Section 106 of RA 7160, shall act as the  
17 C/MLUPC that will tackle land use concerns whenever necessary. A duly authorized  
18 representative from the DHSUD, DAR, DA, DENR, DPWH and DILG shall be included in  
19 the composition of the C/MLUPC. In addition to the functions enumerated in Section 109 of  
20 RA 7160, the C/MLUP shall:

21 (a) Advise the *Sangguniang Bayan* or *Sangguniang Panlungsod* on all matters  
22 pertaining to land use and physical planning;

23 (b) Review and endorse to the *Sangguniang Bayan* or *Sangguniang Panlungsod*  
24 for adoption, the CLUP prepared and periodically updated by the City/Municipal Planning  
25 and Development Office and other land use and physical planning-related policies;

(c) Decide and resolve policy conflicts on land use planning, classification, and allocation that may arise between and among barangays and any unresolved land use conflict at the barangay level regarding the violation of zoning ordinances including opposition to applications for locational clearances, permits or certificates; and

(d) Advise the local zoning board of appeals and adjustments on all issues and conflicts relating to zoning.

For purposes of this Act, the City/Municipal Planning and Development Coordinator (C/MPDC) shall: (a) act on all applications for locational clearances for all projects except those of vital and national economic or environmental significance; and (b) monitor on-going/existing projects within their respective jurisdictions and issue notices of violation to owners, developers, or managers of projects that are violative of zoning ordinances.

The C/MLUPC may call upon any local official concerned such as C/MPDC, city/municipal agriculturist, city/municipal environment and natural resources officer, city/municipal engineer, city/municipal assessor, or any official of national agencies during discussions on land use and physical planning concerns. LGUs without operational C/MPDC as mandated by RA 7160, as amended, shall activate their respective councils within six (6) months from the effectivity of this Act.

## CHAPTER VI

### ADOPTION, APPROVAL AND REVIEW OF LOCAL LAND USE AND PHYSICAL FRAMEWORK PLANS

SEC. 26. *Approval and Review of PPFD and CLUPs.* – The PPFD, CLUPs and zoning ordinances (Zos) of the respective LGUs, including provinces, highly urbanized cities and independent component cities, shall be submitted by the local land use committees to the local development councils for transmission to their respective local *Sanggunian* for approval.

**SEC. 27. *Provinces and Independent and Highly Urbanized Cities.*** – Provinces and independent and highly urbanized cities shall have the power and authority to adopt and approve their respective CLUPs, zoning ordinances or provincial physical framework plan, as the case may be, through their respective *Sanggunian* but subject to the review of the RLUPC as provided in Section 23(d).

## CHAPTER VII

## MAPPING AND DATA MANAGEMENT FOR LAND USE PLANNING

SEC. 28. ***National Base Mapping Program.*** – A national mapping program shall be implemented, coordinated, and monitored through the creation of an Inter-agency Technical Committee (ITC) composed of the NAMRIA, as the lead agency, BSWM, the Forest Management Bureau (FMB), the Land Management Bureau (LMB), the Biodiversity Management Bureau (BMB), the Mines and Geosciences Bureau (MGB), the Philippine Institute of Volcanology and Seismology (PHIVOLCS), DAR, the National Water Resources Board (NWRB), Department of Energy (DOE), NEDA, Philippine Statistics Authority (PSA), University of the Philippines Resilience Institute (UPRI), NCIP, and other concerned government agencies/bureaus. The ITC shall be constituted, and the mapping program shall be initiated, within thirty (30) days from the effectivity of this Act. The agencies mentioned in this Section shall finish their base mapping program within one (1) year upon the effectivity of this Act.

For purposes of uniformity and standardization, the LGUs, to be assisted by the appropriate agencies of the national government, shall likewise prepare their respective territorial maps using scales, symbols, and other indicators to be prescribed in accordance with this Act. The completed maps shall be integrated in the NPPF pursuant to Section 5 of this Act.

1           SEC. 29. ***National Geospatial Information Program.*** – Within one (1) year upon the  
2   effectivity of this Act, the NAMRIA, in coordination with BSWM, FMB, LMB, BMB, MGB,  
3   PHIVOLCS, DAR, NWRB, NCIP, DOE, NEDA, PSA, UPRI, and other concerned  
4   government agencies or bureaus shall complete the updating of base maps including national  
5   disaster risk maps. These base maps and corresponding geospatial data shall be shared and  
6   disseminated to all agencies and LGUs to serve as reference in plan preparation and other  
7   planning activities.

8           SEC. 30. ***National Hazard Mapping Program.*** – Within thirty (30) days from the  
9   effectivity of this Act, a nationwide hazard mapping and probabilistic hazard risk assessment  
10   program shall be initiated jointly through the NLUC by the PHIVOLCS, the Philippine  
11   Atmospheric Geophysical and Astronomical Services Administration (PAGASA), NAMRIA,  
12   MGB, BSWM, DOE, and UPRI, in coordination with the National Disaster Risk Reduction  
13   and Management Council (NDRRMC), the Regional Disaster Risk Reduction and  
14   Management Council (RDRRMC), NCIP, NCCA, and other concerned government agencies.  
15   The program shall include the generation of indicative hazard zoning maps that will outline  
16   areas in the Philippines which are prone to liquefaction, landslides, severe flooding, lahar,  
17   ground rupturing, tsunami, river erosion, coastal erosion, sinkhole collapse, earthquake, lava  
18   flow, pyroclastic flow, base surge, and other natural hazards.

19           For purposes of uniformity and standardization and in order to develop a safe-built  
20   environment, the LGUs shall subsequently incorporate and integrate the generated hazard  
21   zoning maps in their respective CLUPs. Said hazard maps shall serve as guide for all the  
22   LGUs in the preparation of their own hazards-constrained development plans. The NPFP,  
23   pursuant to Section 5 hereof, shall incorporate these hazard maps.

24           All infrastructure activities including real estates and subdivision projects and the  
25   development of tourist spots requiring an Environmental Compliance Certificate (ECC) shall

1 be required to submit an Engineering Geological and Geo-hazard Assessment Report  
2 (EGGAR).

3 SEC. 31. ***Basic and Applied Research for Science and Technology Development.*** –

4 Within one (1) year from the effectivity of this Act, the Department of Science and  
5 Technology (DOST), in coordination with concerned agencies, academe, and research  
6 organizations, shall formulate a research agenda that will support physical framework and  
7 land use planning.

8 SEC. 32. ***Scope and Nature of Responsibilities of Other National Government***

9 ***Agencies.*** – All concerned national government agencies shall periodically report to the  
10 NLUC on the various activities and accomplishments on land use, including their respective  
11 sectoral or development plans. The NLUC may call upon the agencies for technical and  
12 administrative support.

13 SEC. 33. ***Monitoring of CLUP Implementation.*** – The DHSUD shall design and

14 install an information system for monitoring the actual use of land resources, the  
15 reclassification of agricultural lands authorized by cities and municipalities, and the  
16 implementation of CLUPs of LGUs with a view to ensuring the compliance with national  
17 policies, standards and guidelines: *Provided,* That the system shall be developed in  
18 coordination with DA, DAR, DILG, DENR, DPWH, NEDA, league of provinces, league of  
19 cities, league of municipalities, other concerned national government agencies, academe, and  
20 research organizations .

21 SEC. 34. ***Submission of Annual Report on the Implementation of CLUPs.*** – The

22 C/MLUPC shall submit an annual report on the implementation of their land use plans to the  
23 PLUPC, which shall integrate the same for submission to the RLUPC, which shall in turn  
24 integrate the provincial reports for submission to the NLUC.

1 **CHAPTER VIII**

2 **SPECIAL AREAS OF CONCERN**

3 **Article 1**

4 **Forest Lands and Reservation of Watershed**

5 SEC. 35. *Reversion of Alienable and Disposable Lands to Forestlands.* – Upon the  
6 recommendation of the Secretary of the DENR, duly reviewed and endorsed by the NLUC,  
7 and after due consultations with the concerned LGUs and affected parties, Congress may  
8 authorize the reversion of alienable and disposable lands of the public domain or portion  
9 thereof to forestlands, unless they are covered by existing titles, or actually occupied openly,  
10 continuously, adversely, and publicly for a period required by law: *Provided*, That, when  
11 public interest so requires, steps shall be taken to expropriate such lands, cancel defective  
12 titles, or eject occupants thereof. Thereafter, said lands shall be included in the preparation of  
13 land use plans within forestlands.

14 SEC. 36. *Critical Watershed Areas.* – The DENR, in coordination with the DA,  
15 LGUs and other government agencies, including government-owned and controlled  
16 corporations, and after mandatory public hearings or consultations, shall identify and  
17 delineate critical watershed areas that need to be protected, rehabilitated, enhanced or  
18 withdrawn from uses that contribute to their further degradation.

19 SEC. 37. *Formulation and Implementation of Integrated Watershed Management*  
20 *Plans.* – A Watershed Management Council (WMC), which is a multi-agency, inter-LGU,  
21 and multi-sectoral consortium, chaired by the DENR and co-chaired by the duly designated  
22 representative of the LGUs, shall be created at the provincial level to ensure effective and  
23 sustainable resource management of a particular watershed and provide the development  
24 needs of local communities. in cases where a watershed transcends more than one province, a  
25 WMC at the regional level shall be created.

The WMC shall prepare the Integrated Watershed Management Plans (IWMP) consistent with the existing DENR laws, guidelines, and rules and regulations. The said IWMPs shall be integrated into the CLUPs of the LGUs.

The DENR and the concerned LGUs shall jointly implement the Watershed Management Plan subject to regular consultations with and involvement of the community and other stakeholders.

SEC. 38. *Establishment and Management of National Parks.* – All areas proclaimed by the President of the Philippines and Congress of the Philippines to be under the NIPAS, unless disestablished, including those identified as initial components of the NIPAS as KBAs, shall comprise the national parks classification of the public domain. The DENR and concerned LGUs shall ensure that such areas are integrated in the CLUP and physical framework plans. The preparation of management plans of protected areas and national parks shall be in accordance with the provisions of RA 7586, as amended, and other laws establishing or declaring specific areas as protected areas.

## Article 2

## Coastal Zones

SEC. 39. *Criteria on the Allocation and Utilization of Lands within the Coastal Zones.* – The allocation and utilization of lands within the coastal zones shall be guided by the following:

(a) Areas vegetated with mangrove species shall be preserved for mangrove protection and shall not be converted to other uses;

(b) Areas which meet all accepted criteria on elevation, soil type, soil depth, topography, supply for successful fishpond development, and are not identified as mangrove protection areas, shall be utilized for aquaculture purposes;

(c) Areas sub-classified as mangrove and still suitable for use as such, or due to environmental conditions need to be preserved as mangrove, but is devoid of mangrove

stands shall not be converted to other uses. The DENR shall ensure that these lands shall be reforested within a given period of time;

(d) Areas accessible to the sea and identified for fisherfolk settlement and housing shall be allocated to traditional fisherfolk who are inhabitants of the coastal communities and members of legitimate fisherfolk organizations and/or holders of stewardship lease contracts or titles to ancestral domains or any form of property right arrangements who participate in coastal resource management initiatives, subject to the usual census procedures of the DHSUD.

(e) Areas which do not fall under (a) to (d) above may be devoted to recreational or tourism purposes: *Provided*, That such undertaking will not result in environmental degradation and displacement of small fishers;

(f) Areas which are considered as traditional fishing grounds shall be used primarily for such purpose;

(g) Areas which have been allocated for small infrastructure needed by fisherfolk shall be allowed;

(h) Areas which form part of foreshore lands as defined in this Act including those which are under lease agreements or arrangements shall undergo zoning and evaluation to determine their boundaries and actual sizes and corresponding uses: *Provided*, That vested rights under the lease agreements or arrangements shall be respected. Evaluation of the said lands shall also consider the natural, geologic and geomorphic conditions of the coast; and

(i) The free and prior informed consent of the concerned ICCs/IPs and the necessary certification from the NCIP shall be secured before any allocation and utilization of lands within the coastal zones that are found to be within ancestral domains.

**SEC. 40. Coastal Land Zone Sub-classification.** – All public lands in the coastal zones are sub-classified into any of the following: fishponds, mangroves for protection from tidal surge and for preservation of biodiversity, habitats and sanctuaries for endangered

wildlife, fisherfolk settlement, or recreational or tourism areas. No sub-classification of coastal zones to different uses may be done without the following:

(a) Conduct of a comprehensive inventory and resource and environmental assessment by the DENR with the respective LGUs and accredited non-government organizations (NGOs) or peoples organizations (POs) within their territorial jurisdiction. The result of the assessment along with a list of all existing applications and expired foreshore lease agreements must be posted in three (3) conspicuous places in the affected localities; and

(b) Prior consultation with the local Fisheries and Aquatic Resource Management Councils pursuant to RA 8550 as amended.

**SEC. 41. *Zoning of Foreshore Areas.*** – LGUs, in coordination with the DENR, shall conduct zoning of their respective foreshore areas to assist government and community fishers identify priority areas for conservation and development, and to enable them to set targets for mangrove reforestation and rehabilitation.

**SEC. 42. *Protection of Waterways, Easements and Flood Plains.*** – Structures of any kind may not be built in waterways and easements. Pursuant to PD 1067, the banks of rivers and streams and the shores of the seas and lakes throughout their entire length and within a zone of three (3) meters in urban areas, twenty (20) meters in agricultural areas and forty (40) meters in forest areas along their margins are subject to easement of public use only in the interest of recreation, navigation, floatage, fishing and salvage.

The protection of flood plains shall use the watershed management plan as the reference framework in formulating flood mitigation plan. Development within flood plains and other flood-prone areas must be controlled or, if allowed, must be so sited, constructed and serviced that the lives of occupants are not put at risk and that disruptions during floods are minimized. The identification and characterization of flood-prone areas and flood plains must be an integral part of Watershed Management Plan that shall guide the preparation of CLUPs, local climate change action plans local disaster risk reduction and management plans

1 and other prescribed thematic plans. The LGUs shall establish land use regulations to  
2 mitigate flood risks through the CLUPs and zoning ordinances.

3 To promote the best interest and coordinated protection of flood plains, the DPWH, in  
4 coordination with the DOST and DENR shall declare flood control areas as necessary and  
5 shall prohibit or control activities that may damage or cause deterioration of lakes and dikes,  
6 obstruct the flow of water, change the natural flow of rivers, increase flood losses or  
7 aggravate flood problems, pursuant to PD 1067.

### 8 **Article 3**

#### 9 **Settlements Development**

10 SEC. 43. *Municipalities, Cities, and Settlements Development.* – The development  
11 of municipalities, cities and settlements through CLUP and implemented by the zoning  
12 ordinances of cities and municipalities are guided by the urban zoning standards designed to  
13 maximize existing urban spaces, taking into account the studies of pertinent government  
14 agencies on climate change. The new and existing government buildings within the cities and  
15 municipalities shall comply with the government energy management program and the Inter-  
16 Agency Energy Efficiency and Conservation Committee resolutions.

17 SEC. 44. *Settlements within Hazard Areas.* – Settlements, in particular, housing or  
18 residential developments, within hazard areas may be allowed: *Provided,* That mitigating or  
19 protective measures are adopted to address the potential danger or risk to lives and property  
20 within such settlements. In coordination with the concerned agencies of the government such  
21 as the PHIVOLCS, PAGASA, and MGB, the NLUC shall provide assistance to concerned  
22 LGUs and settlers in instituting safety and corrective measures to address the potential danger  
23 or risk. Residential zones as designated in the CLUP shall not be considered as outside the  
24 hazard areas. However, for this purpose, housing projects within such areas with less than or  
25 equal to one (1) hectare of project area shall be exempt from the ECC as well as the EGGAR

1 and may be implemented without the need for any further certificate of exemption from the  
2 DENR or any other government regulatory agency.

3 SEC. 45. ***Designation of Waste and Environment Management Site.*** – Each city or  
4 municipality shall identify, designate and allocate a suitable area, as indicated in the  
5 watershed management plan within their territorial jurisdiction, to serve as sanitary landfill or  
6 solid waste disposal site as established in its solid waste management plan pursuant to RA  
7 9003 or the “*Ecological Solid Waste Management Act of 2000*” within one (1) year from the  
8 effectivity of this Act.

9 SEC. 46. ***Network of Settlements.*** – The framework and policies for the development  
10 of network of settlements shall be provided by the National Physical Framework Plan  
11 formulated by the NLUC. Individual settlements shall be planned as part of a national  
12 network of settlements. The network shall be based on existing and potential settlements;  
13 production activities, particularly those that involve highly competitive industries and  
14 services and generate local employment; environmental constraints and sustainability  
15 considerations. Individual cities and municipalities shall be integrated through transportation  
16 and other infrastructure support facilities.

17 SEC. 47. ***Criteria for Settlement Sites.*** – The following shall be the criteria for  
18 identifying settlement areas:

19 (a) Within A&D lands but not in environmentally-critical, hazard-prone or other  
20 protection areas as assessed, identified and indicated in the Watershed Management Plans;

21 (b) Along established urban growth directions;

22 (c) Are already or can be provided with basic services and utilities;

23 (d) Ideally within the 0-8% slope range, but with mitigating measures from slope  
24 9-17%;

25 (e) Reasonably accessible from existing built up areas and other employment  
26 centers through existing or proposed roads and other transportation facilities; and

1 (f) Identified ICCs/IPs settlement areas shall be located within ancestral domains.

2 Hazard-prone areas shall be defined, delineated and mapped by the DENR and other  
3 mandated government agencies, together with LGUs during the preparation of management  
4 plans of the watersheds that are partially or wholly inside the jurisdiction of the municipality  
5 or city. As such, new settlements within high-risk areas shall not be allowed. In cases where  
6 there are existing settlements within geo-hazard areas or high-risk areas, mitigating or  
7 protective measures shall be adopted to address the potential danger or risk to lives and  
8 property within such settlements. In coordination with the concerned agencies of the  
9 government, the NLUC, through the RLUPC and PLUPC, shall provide assistance to  
10 concerned LGUs and settlers in instituting safety and corrective measures to address the  
11 potential danger or risk. New developments within geo-hazard areas shall be required to  
12 submit an ECC and EGGAR consistent with the Revised Procedural Manual for DENR  
13 Administrative Order (DAO) No. 2003-30 otherwise known as the *“Implementing Rules and  
14 Regulations (IRR) for the Philippine Environmental Impact Statement (EIS) System”* and  
15 DAO No. 2000-28 otherwise known as the *“Implementing Guidelines on Engineering  
16 Geological and Geohazard Assessment as Additional Requirement for ECC Applications  
17 covering Subdivision, Housing and other Land Development and Infrastructure Projects”*.

18 SEC. 48. **Sustainable Communities.** – Each city or municipality or cluster of cities or  
19 municipalities, as appropriate, shall seek to follow the basic features of sustainable  
20 communities, as guided by the National Urban Development and Housing Framework:  
21 transit-oriented, pedestrian-biased, and multiple use, with systems and practices that promote  
22 water use efficiency, energy efficiency, waste segregation, recycling, and adequate  
23 community facilities. Cities and municipalities or clusters thereof shall identify, designate  
24 and allocate areas within their territorial jurisdiction to serve as waste disposal site following  
25 the provisions of RA 9003.

1 For energy efficiency, cities and municipalities or clusters thereof shall utilize energy  
2 consuming products which comply with the DOE's efficiency rating and energy labeling  
3 system pursuant to the provision of RA 11285 or the "*Energy Efficiency and Conservation*  
4 *Act*".

5 SEC. 49. ***Designation and Zoning of Socialized Housing Zones.*** – Each city or  
6 municipality in urban, urbanizable and rural areas shall designate, through the CLUP,  
7 adequate lands for housing or residential purposes, including socialized housing and  
8 resettlement areas for the immediate and future needs of the local population as well as the  
9 underprivileged and homeless in their territory, pursuant to existing laws and regulations. In  
10 order to ensure adequate availability of lands for the housing needs of the local population,  
11 the CLUP shall be updated, at maximum, every twelve (12) years for provinces, cities and  
12 municipalities.

13 The designated sites for socialized housing shall be located in residential zones, and  
14 shall be zoned as socialized housing zones that are integrated in the city or municipality's  
15 zoning ordinance, pursuant to existing laws and regulations.

16 Fisherfolk settlements and housing in coastal municipalities shall be zoned near the  
17 sea for easy access to their livelihood as provided under Section 39 (d) of this Act.

18 The housing or residential lands designated in the CLUPs and zoning ordinances of  
19 cities and municipalities shall, on one hand, not be subject to further land reclassification by  
20 the LGU or land conversion procedure under DAR. On the other hand, agricultural lands as  
21 designated in the CLUP which are no longer economically feasible for agricultural use may  
22 be subject to land reclassification or land use conversion to housing or residential purposes  
23 and such land use conversion, as the case may be, shall be exempt from the coverage of any  
24 moratorium on land use conversion, provided such conversion shall not conflict with the  
25 prescriptions of watershed management plans and shall not result in serious environmental  
26 and ecological problems.

1 the DA, with the mandatory public consultations: *Provided, further,* That consistent with the  
2 State policy on giving priority to the completion of the comprehensive agrarian reform  
3 program, all lands subject to the comprehensive agrarian reform program including those  
4 lands covered under notice of compulsory acquisition or voluntary offer to sell, production or  
5 profit-sharing, or commercial farm deferment shall also be protected from conversion  
6 pending the distribution and installation of the farmer beneficiaries, but thereafter, Section 22  
7 of RA 9700 shall apply: *Provided, furthermore,* That the conversion of prime agricultural  
8 lands for use in priority government projects for basic services such as, but not limited to,  
9 irrigation and power shall be allowed only upon the recommendation of the Secretaries of the  
10 DA and the DAR: *Provided, finally,* That the mapping of the NPAAAD under the RA 8435  
11 shall be completed within one (1) year from the effectivity of this Act. Lands defined under  
12 Section 10 of RA 6657 shall remain exempted and excluded from the coverage of the  
13 comprehensive agrarian reform program. With due consideration of the above-mentioned  
14 conditions that provides for the full protection of prime agricultural land, only then, upon  
15 approval by the DAR of the application for conversion, agricultural lands are deemed  
16 converted to non-agricultural uses.

17 **SEC. 54. *Sub-classification or Re- classification of Agricultural Lands by LGUs.* –**

18 Sub-classification or re-classification of agricultural lands to other uses under Section 20 of  
19 RA 7160 shall exclude the protected agricultural lands as stated in the preceding section.  
20 Moreover, such sub-classification or reclassification is not synonymous to conversion.  
21 Further, such sub-classification or re-classification shall not result to land uses that are in  
22 conflict with the prescriptions of the watershed management plans. The DA and DAR shall  
23 provide the LGUs with complete list and maps of protected agricultural lands within their  
24 territorial jurisdictions.

25 **SEC. 55. *Criteria for the Utilization and Allocation of Land for Mining Purposes.* –**

26 Consistent with this Act and the provisions of RA 7942, otherwise known as the “*Philippine*

1 *Mining Act of 1995*", and to ensure that the objectives of maintaining ecological balance and  
2 maximizing economic returns to mining operations are realized, the allocation and utilization  
3 of lands for mining purposes shall be guided by the following:

4 (a) The principles of sustainable development and responsible mining;

5 (b) In case of small-scale mining, adequate and acceptable safeguards shall be  
6 instituted by the holders of mining rights or permits to prevent environmental degradation of  
7 the mining sites and adjacent areas;

8 (c) Mineral reservations which have become non-operational as determined by the  
9 MGB shall be placed under appropriate surface management by the DENR after conducting  
10 scientific, geological, and environmental studies in accordance with relevant laws on mineral  
11 reservation establishment and de-establishment;

12 (d) Natural forests, proclaimed watershed forest reserves, mangrove forests, and  
13 mossy forests are closed to mining operations pursuant to RA 7942, and other pertinent laws;

14 (e) Consistent with RA 7942, areas closed to mining operations like natural  
15 forests, proclaimed watershed forest reserves, mangrove forests, and mossy forests shall be  
16 periodically reviewed through mineral exploration to be undertaken by the DENR for the  
17 purpose of determining whether or not their continued closure is consistent with the national  
18 interest and with the prescriptions of watershed management plans and, if warranted,  
19 recommend their reclassification as mineral lands; and

20 (f) Protection forestlands and agricultural lands shall be exempt from mining  
21 activities to minimize the effect of natural calamities and to protect food security  
22 respectively. The small to large scale mining operations shall yield from and recognize the  
23 tenorial instrument given by the government such as original certificate of title, transfer  
24 certificate of title, certificate of ancestral domain title, emancipation patent-certificate of land  
25 ownership award and other instruments. If these be present, mining activity shall be allowed  
26 subject to clearances and consent, and: *Provided*, That mining activity shall not conflict with

1 the prescriptions of watershed management plans and shall not have serious environmental  
2 and ecological problems.

3 SEC. 56. ***Reversion of Mineral Lands.*** – All mineral lands with exhausted mineral  
4 resources, as determined by the MGB upon the recommendation of the DENR, shall revert to  
5 its original land classification, that is, as forestland or agricultural land. In the case of  
6 forestlands, the DENR may classify such areas for other purposes in consultation with  
7 concerned LGUs, DOT, and other national government agencies, and consistent with the  
8 prescriptions of the watershed management plans.

## 9 **Article 6**

### 10 **Energy Resources**

11 SEC. 57. ***Guidelines for the Utilization and Allocation of Lands for Energy***  
12 ***Resource Exploration, Development, Production, Utilization, and Distribution Purposes.*** –  
13 To ensure that the objectives of maintaining ecological balance and maximizing the power  
14 potential from indigenous energy resources in the most economical and environmentally-  
15 acceptable means are realized, the allocation and utilization of lands are to be guided by the  
16 following, consistent with the existing laws, rules and regulations on energy resources:

17 (a) Indigenous energy resource exploration and development for the purpose of  
18 creating a national energy resource inventory and data base as well as an energy resource  
19 block map are allowed, subject to the prescriptions of watershed management plans and other  
20 land management plans;

21 (b) Indigenous energy resource exploration, development, production, utilization,  
22 and distribution are subject to the appropriate requirements and processes of the  
23 Environmental Impact Statements (EIS) system. Each project must secure an ECC prior to  
24 project implementation to ensure that adequate and appropriate environmental management  
25 measures and optimum methods for resource access and recovery are used;

1 (c) Protected areas defined in Section 17 of this Act are closed to any kind of  
2 energy resource development except for installation or erection of power lines therein  
3 *Provided*, That vested rights granted through the Special Use Agreements in Protected Areas  
4 as granted by the DENR are respected;

5 (d) Energy reservations or portions thereof which have become or have been  
6 established to be non-economically viable to operate or are no longer used for energy  
7 purposes must be reclassified to other land uses, subject to existing laws covering energy  
8 reservations and to prescriptions of watershed management plans; and

9 (e) Renewable energy is preferred over other energy resource.

10 SEC. 58. ***Reversion of Energy Resource Lands.*** – All exhausted indigenous energy  
11 resource lands, as determined by the DOE, which are not covered by proclamations must  
12 automatically revert to the category of forestlands or agricultural lands, open to disposition,  
13 whichever is appropriate, unless the DENR classifies such areas for other purposes consistent  
14 with the prescriptions of watershed management plans. Exhausted energy resource lands are  
15 specific energy resource sites that the energy reserves of the desired type or types are no  
16 longer in sufficient quantity or quality to justify additional expenditure for its extraction and  
17 utilization.

## 18 **Article 7**

### 19 **Industrial Development Areas or Sites**

20 SEC. 59. ***Criteria for Designating Industrial Development Areas.*** – The  
21 identification and establishment of industrial development areas shall conform to the  
22 provisions of RAs 7916, 6657, 8371, 7279, 8550, and 8435, taking into consideration the  
23 following:

24 (a) Identified network of areas for agricultural development and protected  
25 agricultural areas pursuant to the RA 8435;

- 1 (b) National policies on the regional dispersal of industries and agri-based  
2 industrial development;
- 3 (c) Identified growth areas and corridors in the National Development Plan;
- 4 (d) NIPAS and non-NIPAS areas such as KBAs and restored areas that require  
5 protection;
- 6 (e) National and Urban Development and Housing Framework;
- 7 (f) Identified socialized housing zones;
- 8 (g) National framework for physical planning and other existing national  
9 programs and policies; and
- 10 (h) Prescriptions of watershed management plans.

11 The designated industrial development areas must be located only in production land  
12 uses areas and shall form an integral part of the land use plan and zoning ordinance of the city  
13 or municipality where these areas are located pursuant to RAs 6657, 8371, 7279, 855, 8435,  
14 and 7160, as amended.

## 15 **Article 8**

### 16 **Tourism Development Areas**

17 SEC. 60. *Designating Tourism Development Areas.* – The identification, selection,  
18 and development of tourism development areas, and Tourism Enterprise Zones shall be done  
19 in consultation and coordination with the LGUs, TIEZA, DOT and other national government  
20 agencies, the private sector and the affected communities subject to the provisions of RA  
21 9593, otherwise known as “*The Tourism Act of 2009.*” Tourism development areas include  
22 those covered by legislative and executive issuances such as tourist spots, tourist zones and  
23 tourism ecozones which can be developed into tourism estates or integrated resort, or  
24 integrated resort leisure and recreation complexes. Other tourism-related facilities and those  
25 identified in the national, regional and area-specific tourism master plans and other sector  
26 plans, such as ecotourism and agri-tourism sites are also considered as tourism development

areas. The sites designated for tourism development must be outside of the areas identified for protection land use. As much as practicable, community-based tourism shall be the principal mode of tourist spot operation. RAs 6657, 8371, 7279, 8435, 7160, and EO 111, series of 1999, which provided for the national ecotourism strategy, shall apply to all tourist zones and tourist development areas. Designated areas for tourism development form part of the CLUPs and zoning ordinances of the cities or municipalities where these areas are located.

SEC. 61. ***Identification and Declaration of Areas for Protection, Conservation and Preservation of Cultural Heritage.*** – Pursuant to RA 10066 or the “*National Cultural Heritage Act of 2009*,” the NHCP or the National Museum, the NCCA, in coordination with NCIP, DHSUD and other concerned agencies, local communities, and the private sector, shall identify declared areas and structures which shall be protected and preserved as part of the Philippine cultural heritage.

The LGUs in coordination with the NHCP, the NCCA and the Cultural Center of the Philippines (CCP) shall designate historical zones to protect the historical integrity of said geographical areas and cultural space of intangible cultural properties.

Declared and known archaeological sites shall likewise be protected by the NCCA, the DHSUD, NCIP, other concerned government agencies, and LGUs against modification, alteration, or destruction.

## Article 9

## Infrastructure Development

SEC. 62. ***Strategic Transport Network.*** – The national government, through the Department of Transportation, shall establish a strategic and sustainable multimodal transport network that provides connectivity within the national network of settlements. Such connectivity shall include linkages among existing and proposed priority urban centers, rural areas, production hubs and tourism zones, distribution centers and markets, and key

1 international points of entry. It shall be developed to promote network efficiency and social  
2 service delivery, to catalyze areas identified critical for economic growth, while minimizing  
3 negative impacts to environmentally-critical and protected areas as identified in the  
4 watershed management plans.

5 The national network of settlements, as defined in the NPFP, shall guide the  
6 development of a multi-modal transportation network. The network shall be designed and  
7 implemented to provide seamless connectivity among the various modes of transportation.  
8 The RFPs, PPFDs and city or municipal CLUPs shall focus on the transportation network  
9 that corresponds to their respective jurisdictions while maintaining consistency with the  
10 overall national networks.

11 SEC. 63. *Allocation and Use of Land for Infrastructure Development.* – Land,  
12 whether public or private, shall be allocated and utilized for priority infrastructure projects  
13 that are supportive of national or local development objectives. The NEDA, in consultation  
14 with the national government agencies, LGUs and the private sector, shall identify and  
15 periodically review, update or revise the list of priority infrastructure projects under an over-  
16 all national strategic infrastructure development plan subject to the provisions of this Act, RA  
17 8435 and RA 8371. The national strategic infrastructure development plan must be consistent  
18 and integrated in the objectives and directions of the NPFP.

19 In determining and evaluating the list of priority infrastructure projects, consideration  
20 shall be given to those that:

21 (a) Respond to immediate and vital requirements of the national and regional  
22 economy with priority to improving production-market integration, inter-modal transport,  
23 conveyance and logistics linkages, rural infrastructure and the development of the agriculture  
24 and fisheries sectors;

25 (b) Upgrade existing facilities to international public safety standards;

26 (c) Address the need for sustainable settlement development; and

(d) Mitigate the destructive effects of natural disaster-causing phenomena or serve as alternatives to existing infrastructure found in natural hazard-prone areas.

The provision and implementation of infrastructure support must be made compatible with existing environmental conditions and the physical, whether natural or human-made, and cultural character of the area. Mandatory public consultations pursuant to existing laws and regulations must be held prior to the conduct of all infrastructure projects that necessarily involve dislocation or displacement of people in the area.

The proponent of the infrastructure project shall follow the rules on just and humane eviction or demolition under Section 28 of RA 7279 as a last resort, notwithstanding the provisions of RA 8975, prohibiting lower courts from issuing temporary restraining orders, preliminary injunctions or preliminary mandatory injunctions. The proponent shall also follow the provisions of RA 8371, particularly those pertaining to the rights of IPs or ICCs in case of displacement. The national government infrastructure projects shall, after determining that displacement is unavoidable, include the budgetary requirements for the adequate relocation of displaced communities.

SEC. 64. *Infrastructure Projects within Geo-hazard Areas.* – Construction of priority infrastructure projects within hazard-prone areas are allowed. However, mitigating or preventive measures must be adopted and implemented to address the potential adverse economic, socio-cultural and environmental impacts that emanate from these infrastructure projects, subject to the findings and recommendations of a feasibility study or environment impact assessment in accordance with PD 1586 and RA 4846, otherwise known as the “*Cultural Properties Preservation and Protection Act.*”

Existing projects that were undertaken without the required environmental impact assessment and which pose a threat to the environment, or to the integrity of historic, archeological or scientifically significant areas, or impinge on critical ecosystems, and other areas identified in the watershed management plans may be terminated immediately or

1 gradually phased-out and relocated. If the existing project is to be maintained within their  
2 life span, mitigating measures must be adopted and implemented. The rules on mandatory  
3 public hearings or consultations and just and humane eviction or demolition shall also be  
4 observed prior to the termination, gradual phase-out, or relocation of projects that necessarily  
5 involve dislocations or displacement of the people in the area.

## 6 **Article 10**

### 7 **Agro-Industrial Development**

8 SEC. 65. *Land Consolidation for Agro-industrial Development.* - The consolidation  
9 of small-scale agricultural landholdings shall be promoted to take advantage of economies of  
10 scale in agricultural production, to promote value chain development, and to increase farm  
11 incomes and improve the quality of life of farmers. A Land Consolidation and Utilization  
12 Program under the DA shall be established. The program shall implement the following:

13 (a) Consolidation of small contiguous landholdings into bigger agricultural estates  
14 for farm operations and agro-industries;

15 (b) Crafting of a comprehensive plan and study of the optimum utilization and  
16 long-term productivity of bigger landholdings;

17 (c) Private sector participation in agricultural production and management  
18 through adequate security, incentives and reasonable return on investments, within limits set  
19 by existing laws;

20 (d) Development and adoption of cooperative systems that will increase the  
21 participation and protection of small farmers; and

22 (e) Provision of support to consolidated farms in such forms as farm-to-market  
23 roads, irrigation, utilities, logistics, processing facilities, upgrading of basic social amenities,  
24 and marketing assistance to farmers.

1 **CHAPTER IX**

2 **TRAINING, EDUCATION AND VALUES FORMATION**

3 SEC. 66. *Values Formation.* – In order to develop a well-informed, responsible and  
4 committed citizenry, who value the protection, conservation and development of the limited  
5 land and other physical resources of the country, the CHED, with prior consultation with  
6 concerned stakeholders, may include a subject or topic on sustainable land use in the general  
7 education curriculum of higher education institutions.

8 SEC. 67. *Information or Education Campaign and Capacity Building.* – The  
9 NLUC shall spearhead a nationwide information or education campaign on land use and  
10 physical planning together with the local and national government agencies. The DHSUD, in  
11 coordination with DILG, CHED and other concerned agencies shall formulate and implement  
12 a land use management capability building program for national and local government  
13 officials, community leaders, representatives of NGOs, POs, the religious sector and the  
14 general public.

15 **CHAPTER X**

16 **INCENTIVES, SANCTIONS AND PENALTIES**

17 **Article 1**

18 **INCENTIVES**

19 SEC. 68. *Formulation of a System of Incentives and Awards.* – The NLUC shall  
20 come out with a system of incentives and awards to LGUs that regularly update their CLUPs  
21 within the prescribed period, as follows:

22 (a) Provinces, highly urbanized cities, and independent component cities once  
23 every twelve (12) years; and

24 (b) Component cities and municipalities once every twelve (12) years.

25 SEC. 69. *Priority in Giving Technical Assistance to LGUs.* – In providing technical  
26 assistance and other forms of support related to land use management and the implementation

1 of development plans, the national government agencies shall give priority to cities and  
2 municipalities with approved CLUPs. The same assistance and support shall also be provided  
3 to the fifth (5<sup>th</sup>) and sixth (6<sup>th</sup>) class municipalities: *Provided*, That the lack of technical  
4 assistance shall not exempt said municipalities from the provisions of Section 70.

## 5 **Article 2**

### 6 **SANCTIONS AND PENALTIES**

7 SEC. 70. *Failure to Formulate, Enforce, or Implement the CLUPs.* – Within three  
8 (3) years from the effectivity of this Act, all LGUs shall complete the formulation of their  
9 CLUPs.

10 Failure to formulate, enforce or implement the CLUPs shall be subject to the penalties  
11 and sanctions to be imposed by DHSUD pursuant to RA 11201, otherwise known as the  
12 “*Department of Human Settlement and Development Act*” and its Implementing Rules and  
13 Regulations. The DILG, consistent with due process, shall investigate, review, and impose  
14 appropriate action regarding local chief executives and other local officials and employees  
15 responsible for the formulation, enforcement, and/or implementation of the CLUPs in case of  
16 any of the following:

- 17 (a) Failure to implement and enforce the CLUP due to negligence of duty;  
18 (b) Failure to provide appropriate budgetary allocation to effect its  
19 implementation; and  
20 (c) Failure to complete the preparation and undergo review and approval process  
21 of the CLUP despite the availability of funds, resources, and support by the *Sanggunian*  
22 concerned.

23 SEC. 71. *Causing Irrigated Agricultural Lands to be Idle.* – Any person or juridical  
24 entity who shall cause any irrigated lands whether contiguous or not, within the protected  
25 areas for agricultural development, to lie idle and unproductive for a period exceeding one (1)  
26 year, unless due to force majeure, shall be subject to an idle land tax equivalent to five

1 percent (5%) of the value of the agricultural land as appearing in its real property tax  
2 declaration. In addition, the violator shall be required to put back such lands to productive  
3 agricultural use. Should the continued agricultural inactivity, unless due to force majeure,  
4 exceed period of two (2) years, the land shall be subject to escheat proceedings.

5       SEC. 72. ***Person Abetting Illegal Conversion.*** – Any person initiating, causing,  
6 inducing, or abetting illegal conversion as defined in Section 73(c) of RA 6657, as amended,  
7 and Section 4(cc) of this Act shall, upon conviction, be imprisoned from seven (7) to twelve  
8 (12) years and imposed a fine of not less than One hundred thousand (P100,000.00) pesos, or  
9 both at the discretion of the court: *Provided*, That if the offender is a public official or  
10 employee, whether elected or appointed, the penalty shall, in addition thereto, include  
11 dismissal through permanent separation from the service and forfeiture of all benefits and  
12 entitlements accruing to the public position and perpetual disqualification to run or apply for  
13 any elective or appointive public office: *Provided, further*, That if the offender is a juridical  
14 person, the penalty of imprisonment shall be imposed on the president, chief executive  
15 officer, manager, chairperson and all the members of the board, and other responsible officers  
16 thereof, and the fine shall be equivalent to the zonal value of the land or forty percent (40%)  
17 of the shareholders equity, as determined at the time of judgment whichever is higher, plus  
18 forfeiture of the land in favor of the State for sale through public auction, the proceeds of  
19 which shall automatically accrue to the Agrarian Reform Fund as provided for in Section 79  
20 of this Act.

21       SEC. 73. ***Fine for Non-Completion and Non-Commencement of Development of***  
22 ***Agricultural Lands with Approved Order of Conversion.*** – A landowner and designated  
23 developer or duly authorized representative who, without justifiable cause, fails to commence  
24 or complete the development of agricultural lands with approved order of conversion shall be  
25 penalized, jointly or severally, with any of the following fines based on the zonal value of the  
26 land at the time the fine is imposed:

(a) On failure to commence within one (1) year from the date of conversion order:

(1) Six percent (6%) of the zonal value of the subject land for the first three (3) hectares;

(2) Fifteen percent (15%) of the zonal value of the subject land for the next three hectares, and

(3) Thirty percent (30%) of the zonal value of the subject land for the remaining area: *Provided*, That the order of conversion shall be deemed revoked automatically and the land shall revert to its original agricultural use and covered automatically.

(b) On failure to complete fifty percent (50%) of the approved conversion plan within a specified time frame:

(1) Fifty percent (50%) of the zonal value of the subject land and the revocation of the conversion plan on the undeveloped portion which shall automatically revert to its original use as agricultural land. The same shall be covered under the CARP and processed for land distribution as soon as possible.

**SEC. 74. *Change of Use from the Previously Authorized Conversion Order.*** – The landowner and future landowners of the property approved for conversion shall not change its use to another use not authorized under the Conversion Order without prior consent from the DAR. This prohibition extends to changes in housing standards, changes in selling schemes, changes from social housing to open market housing or vice-versa, and all other similar changes, violation of which shall be penalized with revocation of Conversion Order and forfeiture of cash bond.

**SEC. 75. *Payment of Disturbance Compensation.*** – Following the order of priority as enumerated in Section 22 of RA 6657, as amended, qualified beneficiaries such as agricultural lessees and share tenants, regular farm workers, seasonal farm workers, other farm workers, actual tillers or occupants of public lands, collective, or cooperative of the

1 above-mentioned beneficiaries, and others directly working on the land affected by  
2 agricultural land use conversion shall be entitled to the payment of disturbance compensation  
3 equivalent to five (5) times the average of the gross harvests on the landholding during the  
4 last five (5) preceding calendar years or a certain percentage of the converted land, whichever  
5 is higher, as determined by the DAR.

6 SEC. 76. ***Authority to Impose Fine.*** – The DAR shall impose the penalty provided  
7 for under the preceding section.

8 SEC. 77. ***Withdrawal of Local Development Permits or Licenses.*** – Upon receipt of  
9 notice from the DAR of illegal conversion, the concerned agencies, city or municipality shall  
10 withdraw or revoke any development permit or license issued to illegally converted  
11 agricultural lands.

12 SEC. 78. ***Penalty for Reclassification of Protected Agricultural Lands and***  
13 ***Exceeding the Limit of Areas Allowed for Reclassification.*** – Any person initiating, causing,  
14 inducing or abetting the reclassification to non-agricultural uses of protected agricultural  
15 areas as defined in this Act shall be punished with imprisonment of twelve (12) years or a  
16 fine of not less than One hundred thousand Pesos (P100,000.00), or both, at the discretion of  
17 the court.

18 If the offender is a public official or employee, whether elected or appointed, the  
19 penalty includes dismissal from the service, forfeiture of entitlements accruing to the public  
20 position, and perpetual disqualification to run or apply for any elective or appointive position.

21 If the offender is a juridical person, the president, chief executive officer, manager,  
22 chairperson, members of the board and other officers who directly participated in the  
23 violation of this Section shall be held liable.

24 The same penalty is applicable to persons who are responsible for exceeding the limits  
25 set forth under Section 20 of RA 7160 pertaining to reclassification of lands.

SEC. 79. *Utilization of Fines.* – The fines collected under Sections 72, 73 and 78 of this Act shall accrue to the Agrarian Reform Fund and shall be used for the purpose for which the fund is established.

## CHAPTER XI

## TRANSITORY AND FINAL PROVISIONS

SEC. 80. **Convening of the NLUC.** – Within thirty (30) days from the effectivity of this Act, the chairperson shall convene the NLUC.

SEC. 81. ***Implementing Rules and Regulations.*** – Within six (6) months from the effectivity of this Act, the NLUC shall promulgate the rules and regulations to implement the provisions of this Act.

SEC. 82. *Congressional Oversight Committee on the Land Use Act.* – There is hereby created a joint congressional oversight committee to monitor the implementation of this Act. The committee shall be composed of seven (7) senators and seven (7) representatives to be appointed by the Senate President and the Speaker of the House of Representatives, respectively. The members from the Senate shall be appointed based on proportional representation of the parties or coalitions therein, with at least two (2) senators representing the minority. Likewise, the representatives from the House of Representatives shall be appointed based on proportional representation of the parties or coalitions therein with at least two (2) Members representing the minority.

The mandate given to the joint congressional oversight committee under this Act shall be without prejudice to the performance of the duties and functions by the respective existing oversight committees of the Senate and the House of Representatives. The secretariat of the committee shall be drawn from the existing secretariat personnel of the committees comprising the oversight.

SEC. 83. ***Appropriations.*** – The amount necessary for the initial implementation of this Act shall be charged against the current year's appropriations of the departments and

1 agencies concerned. Thereafter, such amount shall be included in the annual General  
2 Appropriations Act.

3 SEC. 84. ***Review of the Existing Land Use Plans.*** – Provinces, cities, and  
4 municipalities with existing land use plans shall review, revise, reconcile, and harmonize  
5 their respective land use plans in accordance with the guidelines and standards issued by the  
6 National Land Use Commission (NLUC) within one (1) year from the effectivity of this Act.

7 All other laws, orders issuance, rules and regulations inconsistent herewith are  
8 repealed or modified accordingly.

9 SEC. 85. ***Non-impairment Clause.*** – Nothing in this Act shall be construed as to  
10 diminish or impair the rights recognized granted, or available to marginalized or the basic  
11 sectors under existing laws or to diminish or impair vested rights generally, including the  
12 rights of indigenous cultural communities and indigenous peoples as provided under RA  
13 8371.

14 SEC. 86. ***Separability Clause.*** – If any provision of this Act is declared  
15 unconstitutional, the remainder of this Act or any provisions not affected thereby shall remain  
16 in full force and effect.

17 SEC. 87. ***Repealing Clause.*** – Sections 10 and 11 of RA 8435, Sections 447 (a2vii)  
18 and 458 (a2viii) of RA 7160, the pertinent provisions of EO 648, series of 1991, EO 72,  
19 series of 1993, EO 770, series of 2008, Letter of Instruction No. 1350, series of 1983, PP  
20 2282, series of 1983 are hereby repealed, amended or modified accordingly.

21 SEC. 88. ***Effectivity.*** – This Act shall take effect fifteen (15) days after its publication  
22 in the *Official Gazette* or in a newspaper of general circulation.

Approved,
