TWENTIETH CONGRESS
First Regular Session

HOUSE BILL NO. 646

Introduced by: **REP. TOBIAS "TOBY" M. TIANGCO**

EXPLANATORY NOTE

It is provided in Section 15, Article 2 of the 1987 Constitution that, "The State protect and promote the right to health of the people and instill health consciousness among them." To achieve this objective, this bill seeks to promote free annual medical check-up including blood sugar and cholesterol tests, and such other laboratory and diagnostic tests.

Majority of the Filipinos do not seek medical care in their lifetime except when they are seriously ill. This problem is also rooted from poverty as most Filipinos would rather buy food than to seek medical checkup. According to a survey by PhilhealthCare., Inc., only 7.4% of Filipinos do not self-medicate. This implies that majority of the Filipinos would rather self-medicate than avail a medical checkup from a licensed physician.

Data from the Philippine Statistics Authority shows that the leading causes of death in the Philippines are, heart diseases, cancer, cerebrovascular and diabetes mellitus. These kinds of diseases can be prevented if there will be regular checkups that can help determine potential health risks before they get worse.

During the 18th Congress, the attached proposed bill, authored by then Representative John Rey Tiangco has passed third and final reading.

In view of the foregoing, the passage of this bill is earnestly sought.
