HOUSE BILL NO. 805

Introduced by **Representative EDUARDO R. RAMA JR.**

EXPLANATORY NOTE

The use of bicycles in the Philippines has significantly gone up as a means to address the need for a safer alternative mode of transportation. A confluence of factors led to more and more people use bicycles not only for leisure, but as a valid form of transportation nationwide.

According to an SWS data, 20% of households owned at least one bicycle by May 2021, while 5% of households indicated that they owned a four-wheeled motor vehicle, outnumbering the motor-vehicle users by a staggering 4:1 ratio.¹ Similarly, a survey commissioned by the Department of Health in 2020 shows that 85% of Filipinos agree that their city or municipality could become a great place for cycling or walking, and a further 87% agreeing that our cities are better off with cycling and walking being prioritized over private vehicles.²

Despite this, bicycles have been largely invisible to transportation planners and government officials. There are no set and clear guidelines to make cycling safer for Filipinos. This bill seeks to institutionalize a framework for a bicycle law by clearly defining the rights, duties, and obligations of cyclists, and ensuring the creation of bikeways and interconnecting bicycle lane networks will be integrated in infrastructure projects nationwide.

² Id.

It's about time that we create policies and build infrastructure that benefit the majority rather than the few, as in the end we can all benefit from a much more livable country.

Thus, the passage of this bill is earnestly sought.
