House Bill No. 3607

Introduced by Representative

EXPLANATORY NOTE

The Municipality of Santa Cruz in the Province of Occidental Mindoro is a first class municipality with a population of more than 41,000. At present, residents obtain their basic healthcare needs from the municipality's community hospital which lacks the necessary facilities and personnel to cater to the healthcare needs of its growing population, especially those needing critical care. Patients in need of advanced treatment are often brought to hospitals located in other municipalities/provinces which are at least 2-4 hours away.

The establishment of a Tertiary Hospital in the Municipality of Santa Cruz will provide more than 41,000 residents access to tertiary healthcare services such as consultations with specialists in medicine, pediatrics, ob-gyne, and surgery. The hospital will also have emergency and outpatient services, isolation facilities, surgical and maternity facilities, departmental clinical services, general ICU, high risk pregnancy unit, NICO, dental clinic, Physical Medicine and Rehabilitation Unit, Ambulatory Surgical Clinic, and Dialysis Clinic. Ancillary services such as tertiary clinical laboratory with histopathology, blood bank and 3rd level X-ray will also be provided.

With this Bill, residents of Santa Cruz and other nearby municipalities who are in need of basic, emergency, or maintenance healthcare will no longer have to travel for long hours to other municipalities/provinces to receive treatment.

In view of the foregoing, the approval of this proposed measure is earnestly sought.
