TWENTIETH CONGRESS

First Regular Session

House Bill No. 4511

Introduced by Representative Jernie Jett V. Nisay

EXPLANATORY NOTE

The Philippines faces a rapidly growing elderly population, bringing with it an urgent need for specialized and accessible health services for senior citizens. Many older Filipinos lack access to proper medical care tailored to their unique conditions, leaving them vulnerable to untreated illnesses, functional decline, and poor quality of life.

This bill seeks to convert the Dr. Eva Macaraeg-Macapagal National Center for Geriatric Health into the National Center for Geriatric Health and Research Institute (NCGHRI). The NCGHRI will serve as the country's premier geriatric specialty hospital and research hub, providing holistic care—from acute and palliative services to rehabilitation and transitional care—while advancing research, training, and policy development in geriatric medicine.

The measure also mandates the establishment of geriatric specialty centers nationwide, enhances training for health professionals, and promotes a people-centered approach to senior care. Through dedicated funding, research, and coordination with concerned agencies, this Act will help ensure that every Filipino elder, especially the underprivileged, receives dignified and quality health services.

In view of the foregoing, the passage of this bill is earnestly sought.
