House Bill No. **6136**

Introduced by: **REP. MARK CHOLO I. VIOLAGO**

EXPLANATORY NOTE

The NFTI, established in 1979, was placed under the supervision of the Philippine Public Safety College (PPSC) by Republic Act No. 6975 (DILG Act of 1990). This proposed transfer aims to align NFTI's operations with the BFP Modernization Program (Republic Act No. 11589) by allowing the BFP to have direct control over the institute's training programs and policies to ensure they are more attuned to the BFP's needs.

Anchored on the State's policy to ensure a highly professional, well trained, and competent fire service, this bill seeks to transfer the National Fire Training Institute (NFTI) under the direct control and supervision of the Bureau of Fire Protection (BFP), in full alignment with the BFP Modernization Program under Republic Act No. 11589.

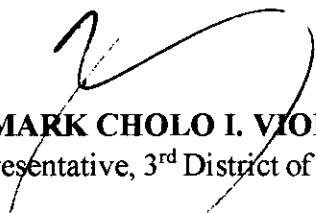

The BFP Modernization Act and its IRR expressly mandates the development of a comprehensive human resource and training program for BFP personnel and volunteers, including the establishment of state-of-the-art training schools and facilities nationwide. This law empowers the BFP to conduct training for its personnel, officers, fire volunteers, and fire safety practitioners in all aspects of fire prevention, suppression, investigation, disaster preparedness, rescue, emergency medical response, and hazardous materials management, and further requires the BFP to develop and implement a comprehensive training program, including mandatory courses for new entrants and newly appointed personnel, and to establish modern training facilities. It authorizes the BFP to hire internationally accredited training consultants and advisers when necessary, and to coordinate with agencies such as the Department of Health (DOH) and TESDA for specialized training needs, particularly for emergency medical services.

Transferring the NFTI to the BFP is a strategic move to optimize government resources, improve efficiency, and ensure that training is responsive to the unique operational requirements of the fire service. With direct control over NFTI, the BFP can swiftly develop and implement curricula, set training standards, and address competency gaps in line with international best practices and the evolving needs of communities.

Currently, the NFTI's placement under the PPSC has resulted in performance gaps due to differing institutional priorities. By vesting the BFP with full responsibility for its own training, the agency can independently formulate and execute plans, policies, and standards for advanced and specialized education in fire safety, emergency response, and disaster management. This move also upholds the academic freedom of the NFTI, allowing it to determine its own teaching methods, curriculum, and admission standards, thereby ensuring globally competitive training for BFP personnel.

The immediate passage of this bill will fully integrate and strengthen the BFP's training services, ensuring that the agency is equipped to meet modern challenges in fire protection, disaster, and emergency response. This will result in a holistic, inclusive, and sustainable approach to fire service training and development, ultimately benefiting the Filipino people and enhancing community safety by 2040.

In view of the foregoing, the immediate approval of this bill is earnestly sought.
