

Republic of the Philippines
House of Representatives
Quezon City, Metro Manila

Twentieth Congress
First Regular Session

HOUSE BILL NO. **6383**

Introduced by Representative LORDAN G. SUAN

AN ACT

**AMENDING SECTIONS 58 AND 59 OF REPUBLIC ACT NO. 6975,
OTHERWISE KNOWN AS THE DEPARTMENT OF THE INTERIOR AND
LOCAL GOVERNMENT ACT OF 1990**

EXPLANATORY NOTE

The Bureau of Fire Protection (BFP), as the primary agency mandated to prevent and suppress destructive fires, conducts fire investigations, and undertake emergency medical and rescue services, is central to the country's public safety infrastructure. With the operational expansion of the Bureau pursuant to Republic Act No. 11589 or the BFP Modernization Act of 2021, it has become imperative to align its internal systems, particularly its rank classification and organizational structure with its broadened scope of responsibilities.

At present, Sections 58 and 59 of Republic Act No. 6975 or the "Department of the Interior and Local Government Act of 1990" remain the governing provisions for the BFP's rank and organizational framework. However, these sections have not been meaningfully updated to reflect the Bureau's growing complexity and evolving operational demands. The lack of a fully defined vertical command structure, modernized career pathways, and functional decentralization at the regional and field levels continues to hinder the effective implementation of the Bureau's modernization.

This legislative measure seeks to amend the said provisions by establishing a rationalized and professionalized rank classification system for all BFP uniformed personnel. The bill adopts a tiered structure with clear lines of authority across the national, regional, provincial, and station levels of the Bureau, ensuring that leadership and responsibility are well-aligned with field operations. The proposed rank system maintains the Bureau's civilian identity, using traditional rank

nomenclature (Fire Officer 1 to Fire Director General), instead of adopting military equivalents, in recognition of the distinct role and culture of the fire service.

This measure is substantially aligned with the legislative intent of Senate Bill No. 2586 of the 19th Congress, which proposed a unified and rational rank classification system across all uniformed Bureaus under the Department of the Interior and Local Government (DILG). However, this bill departs from that measure in two significant respects: first, by maintaining the civilian character of BFP ranks; and second, by amending the enabling statute of the Bureau, RA 6975, rather than RA 9263.

The proposed amendments also outline key positions and command structure across all levels of the Bureau, allowing for clearer delineation of responsibilities, functional oversight, and internal mobility. These structural changes are designed to enhance the delivery of fire protection services nationwide, promote career development, and strengthen leadership across operational units.

This proposed legislation represents the institutional intent of the Bureau of Fire Protection, developed through close consultation and consensus among its various Directorates. It is a product of a unified effort within the Bureau to update and strengthen its internal governance in support of its modernization and professionalization mandate.

In view of the foregoing, the immediate passage of this bill is earnestly sought.

HON. LORDAN G. SUAN
1st District, Cagayan de Oro City
