House Bill No. 7263

EXPLANATORY NOTE

This bill seeks to allow local government units to retain fifty percent (50%) of the collection proceeds from all taxes, fees and fines imposed under Presidential Decree (PD) No. 1185, otherwise known as the Fire Code of the Philippines, to be used for the maintenance and purchase of firefighting gadgets, equipment and fire trucks for its local fire stations.

Pursuant to Section 14 of PD 1185, local government units are mandated to collect fire inspection fees from business establishments within their territories and to remit the same to the national treasury. However, despite the huge amount of fire inspection fees remitted to the National Treasury, the national government fails to provide for the purchase of new fire trucks and equipment necessary for fire prevention. Hence, dilapidated fire trucks and worn out firefighting equipment are perennial problems in the prevention and suppression of fire.

Fire prevention and suppression require the adoption of uniform fire safety standards, the incorporation of fire safety facilities and provision of protective and safety devices in buildings and structures. In order to effectively implement all efforts to minimize the occurrence of fires and their destructive effects, it is imperative to empower the local government units to retain fifty percent (50%) of the said collection proceeds to be used for upgrading equipment and facilities of their respective fire departments. The remaining fifty percent (50%), however, will still be remitted to the National Treasury.

In view of the foregoing, approval of this bill is earnestly sought.
