House Bill No. 8176

EXPLANATORY NOTE

Article II, Sec. 15 of the 1987 Constitution states that:

“The State shall protect and promote the right to health of the people and instill health consciousness among them.”

Furthermore, in Article XIII, Sec. 11, it is also stated that:

“The State shall adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable costs. There shall be priority for the needs of the underprivileged, sick, elderly, disabled, women and children.”

It is in this light and spirit that this legislation is being proposed by the entire Philippine General Hospital (PGH) family, who believe that the creation of plantilla medical specialists items would provide them with an advantage as they continue to provide quality and affordable medical and health care services to the Filipino people specially the underprivileged sick, elderly women and children.

The pool of medical specialists will be composed of graduates of post-residency fellowship training programs of the PGH.

With the creation of these additional items at the country's premiere government hospital, it is expected that this will lead the way for its institutionalization in other government hospital specially those in the tertiary level where post-residency training programs are also administered due to the immense benefits that will be derived therefrom, particularly in the improvement of its current health care delivery system.

In view of the foregoing, immediate approval of this bill is earnestly requested.
