HOUSE BILL NO. 2206

Introduced by **Representative Ryan S. Recto**

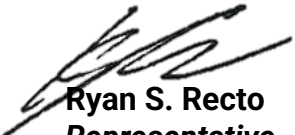

EXPLANATORY NOTE

This proposed measure seeks to create a separate district engineering office dedicated to the Sixth District of Batangas to ensure effective and efficient maintenance of existing infrastructures as well as the planning, design, construction and supervision of future infrastructure projects.

In recent years, The City of Lipa in the Province of Batangas has continued its rapid urbanization. However, it is accompanied by sustained population growth. According to the Philippine Statistics Authority (PSA), Lipa City has a total population of 372,931. These figures then underscores the immense pressure placed on existing public infrastructure, from road networks and bridges to drainage systems and public buildings.

The Fourth District Engineering Office (DEO) currently serves the Fourth and Sixth Legislative Districts in the Province of Batangas. This may cause overstretching of the DEO's resources and can even lead to a less responsive approach to local infrastructure demands. A DEO dedicated solely to Lipa City would not only allow for a more focused, decentralized and efficient resource allocation, but would also ensure the timely execution of essential infrastructure projects. It is hoped that this legislative measure can further support the city's expanding population and dynamic economic activities.

In view of the foregoing, the immediate passage of this bill is earnestly sought.
